Atmospheric Sciences
College of Natural Science and Mathematics
Atmospheric Sciences Program
(907) 474-7608
www.uaf.edu/cssem/

M.S., Ph.D. Degrees
Minimum Requirements for Degrees: M.S.: 30 credits;
Ph.D.: 18 thesis credits

The field of atmospheric science covers a wide variety of disciplines
involving the physical and chemical properties and processes of
the atmosphere. Emerging trends in atmospheric science stress the
interactions of the atmosphere with other components (i.e. land, sea
ice, ocean) in the total earth system.

The UAF Geophysical Institute, the International Arctic Research
Center and other university research institutes have active research
programs in high-latitude atmospheric science that include faculty
from the biology, chemistry, physics and other departments. Current
research by atmospheric sciences focuses on: atmospheric chemistry/
biogeochemistry, climate modeling, cloud and aerosol physics, mesoscale
modeling, numerical weather prediction and aviation weather. In
addition, scientists affiliated with the research institutes conduct
research on ocean-atmosphere interactions, dynamic meteorology,
microclimatology, polar meteorology, radiative transfer, cryosphere-
atmosphere interactions and remote sensing.

Graduate students are an integral component of this research,
both in the laboratory and the field. Research institutes provide
excellent environments for research in atmospheric science as well as
interdisciplinary research with scientists in other research areas.

Graduate Program—M.S. Degree
1. Complete the general university requirements (page 168).
2. Complete the master's degree requirements (page 172).
3. Complete four of the five following basic courses in atmospheric
   sciences:
   - ATM 601—Introduction to Atmospheric Science .................. 3
   - ATM 606—Atmospheric Chemistry ................................. 3
   - ATM 613—Atmospheric Radiation .................................. 3
   - ATM 615—Cloud Physics ............................................. 3
   - ATM 645—Atmospheric Dynamics .................................. 3
4. Complete additional approved 600-level courses ................. 9
5. Complete ATM 699—Thesis ........................................... 6-12
6. Minimum credits required .............................................. 30

Graduate Program—Ph.D. Degree
1. Complete the general university requirements (page 168).
2. Complete the Ph.D. degree requirements (page 172).
3. Complete the following basic courses in atmospheric sciences:
   - ATM 601—Introduction to Atmospheric Science .............. 3
   - ATM 606—Atmospheric Chemistry ............................... 3
   - ATM 613—Atmospheric Radiation ................................ 3
   - ATM 615—Cloud Physics ........................................... 3
   - ATM 645—Atmospheric Dynamics ................................ 3
4. Complete the additional course requirements determined in
   conjunction with the graduate advisory committee.
5. Minimum credits required ............................................. 18
