

Exotic Forest Pests

Self-paced online course

Module 1 – Introduction

Module 2 – Wood Boring Insects

Module 3 – Bark Beetles

Module 4 – Defoliating Moths

Invasive pests threaten our natural areas and the trees in our community. This self-paced, online course covers topics associated with forest health and invasive species and takes a closer look at three specific groups of invasive pests. Topics will include identification, damage, reporting, and management. Help prevent new pests from establishing in Alaska by learning what to look out for and what to do if you discover an invasive pest.

Topics/Description: The course is a four-module series that covers:

- Forest health
- Invasive species
- Pest identification and damage
- How to report potential infestations
- Resources for professionals and landowners

Cost: \$60 if seeking CEUs
CEUs:

- ISA Certified Arborist: 4
- DEC Certified Pesticide Applicator: 4
- SAF Certified Forester: 1

Free if you are just interested in the topic
