Tradition and renewal

Tradition holds that for untold generations, Tanana Athabascans used the ridge the Fairbanks campus is built on, Troth Yeddha’, to pick wild potato. It was a meeting place and a place of sustenance, and it is still a place where people work together and find intellectual nourishment.

The University of Alaska Fairbanks is proud of the students here today who have continued this tradition of collaboration and learning. Commencement is a special time for graduates and their families and friends who come to share this momentous occasion. This ceremony represents an ending, a time of reward for academic endeavor successfully completed. In another sense it is truly a commencement, a beginning, for the learning process is an unending one, to which the years of formal schooling are only a prelude.

Along with our graduates, the University of Alaska Fairbanks acknowledges with pride the contributions of those who will receive honorary degrees or meritorious service awards. The university also expresses gratitude to the dedicated faculty and staff who are retiring this year. Each has made a distinct contribution to the quality and reputation of this institution.

In today’s 96th commencement ceremony, some 600 students will cross the stage to receive a certificate or degree, and overall more than 1,400 graduates will be recognized for their success. Other UAF campuses and learning centers in Bethel, Dillingham, Kotzebue, Nome and Tok will honor their graduates with separate commencement activities.

We honor you, the Class of 2018, for your achievement today.
Congratulations!

UA President James R. Johnsen
Dear Graduate,
Completing your course of study and learning at the University of Alaska Fairbanks is a significant life achievement and an important personal milestone. So, enjoy this day … you’ve earned the celebration. But graduating in higher education is also all about new beginnings. What has your education prepared you to do? My wish is that you always ask questions and then learn from the answers, grow intellectually and contribute regularly to your community. Be it here in Alaska or wherever the future might take you, earning your degree from UAF has prepared you well to write the next chapter in your life. Congratulations and best wishes.
Sincerely,
James R. Johnsen, President
University of Alaska

UAF Chancellor Daniel M. White
Dear Graduate,
Congratulations! Today you are joining a distinguished group of University of Alaska Fairbanks alumni, all of whom share your pride in success. I hope you will take a moment today to reflect on your time at UAF, the lessons learned and the friends you have made. Those experiences will last a lifetime. Whatever your future endeavors may be, I wish you success and happiness.
On behalf of the UAF community, I thank you for all your contributions to this university.
Sincerely,
Daniel M. White, Chancellor
University of Alaska Fairbanks

UNIVERSITY OF ALASKA FAIRBANKS
Commencement Exercises: May 5, 2018
Norm Davis, Class of 1984, will read graduates’ names as they cross the stage

**Processional**
- Acilquq Wind Symphony  “Pomp and Circumstance”
  Director: George Rydlnski

**Grand Marshal**
- Lawrence Kaplan

**National Anthem**
- Ariana Horner, UAF music education major

**Presiding**
- Daniel M. White, Chancellor, University of Alaska Fairbanks

**Remarks**
- James R. Johnsen, President, University of Alaska System

**Introductions**
- Chancellor White

**Conferring of Honorary Degrees**
- Jyotsna Heckman, Board of Regents, University of Alaska System; President Johnsen; Chancellor White; Susan Henrichs, Provost, University of Alaska Fairbanks

**Conferring of Meritorious Service Awards**
- Regent Heckman; President Johnsen; Chancellor White; Provost Henrichs

**Recognition of Emeriti**
- Chancellor White

**Conferring of Degrees**
- John Davies and Karen Perdue, Board of Regents, University of Alaska System; President Johnsen; Chancellor White; Provost Henrichs and Michael Castellini, Dean, Graduate School, University of Alaska Fairbanks

**Introduction of Class Speaker**
- Keith Champagne, Vice Chancellor for Student Affairs, University of Alaska Fairbanks

**Class Speaker**
- Aaron T. Cottle, Class of 2018

**Alumni Association Representative**
- Cindy Wright, Class of 1988
Casey Winkelman, UAF music performance major, accompanied by Rose Crelli, Class of 2018

**Ensemble 64.8 (UAF Percussion Group)**
Director: Eric Retterer

**Exiting Information**
Audience members are kindly requested to remain in their seats until the graduates have completed the recessional. Those seated on the second and third levels may exit the building through the second-floor doors.

**Alumni Reception**
Please join us in the Pioneer Room of the Carlson Center immediately following the ceremony for a reception sponsored by the UAF Alumni Association.

**Assistance for the Hearing Impaired**
There are a limited number of personal hearing devices; go to any information table to obtain one.

**Photography**
Photos of individual graduates will be available through Grad Images, www.gradimages.com, 800-261-2576.

**Safety Information**
Exits are located on both levels of the building. Please take a moment to locate the two exits nearest your seat. In an emergency, information and directions will be announced. Please remain calm and follow all given instructions. In compliance with the Fairbanks fire marshal’s office, the aisles, walkways and doorways must remain clear at all times.

Students in the College of Rural and Community Development have their home campuses indicated beside their names. For the most part, degree candidates outside the Fairbanks area will participate in graduation ceremonies at their home campuses.

* Denotes summer degree recipient  
** Denotes fall degree recipient

Red sashes signify Alaska Native and Native American graduates. Blue sashes signify Community and Technical College students. Red, white and blue honor cords pay tribute to active-duty service members, veterans and Gold Star families of the United States Armed Forces. Tau Beta Pi engineering honor society graduates wear a white stole with an orange logo, or an orange and white cord. Beta Gamma Sigma business honor society graduates wear a blue and gold stole. Student-athletes wear a blue sash with the Alaska Nanooks logo. International students may wear a sash recognizing their home country.
Graduation with Honors
Associate and baccalaureate degree students who graduated with honors in August and December and candidates for graduation with honors in May wear a gold honor cord. Cumulative grade point averages required for graduating with honors are:

- summa cum laude …… 3.9 or higher with no grades lower than an A-
- magna cum laude …… 3.75–3.8
- cum laude …… 3.5–3.74

Honors Program
The Honors Program graduation designation requires exceptional aptitude, academic performance and achievement in a challenging course of study. Honors students complete credits in specially designed courses and an honors capstone/senior thesis. Honors Thesis Scholars earned 12 honors credits and wear a long blue-trimmed and striped gold sash with a single blue and gold honor cord. University Honors Scholars earned 27 honors credits and wear the same sash with a double blue and gold honor cord.

Golden Key Honor Society
Golden Key is an international student-run service organization committed to meeting the needs of scholastic achievers. Members wear a gold medallion on a blue and gold ribbon, a gold satin sash with a blue logo, or a blue and gold honor cord.

Student Leadership Honors and Leadership Distinction
Student Leadership Honors recognition is granted to students who have made significant contributions to enhancing the mission of UAF, the surrounding community and the promotion of student life. Students receiving this recognition wear a burgundy honor cord. Graduation with Leadership Distinction recognition is granted to students who have displayed a commitment of excellence to themselves, UAF and their community. Students receiving this recognition wear a silver honor cord.

Honor Society of Phi Kappa Phi
The Honor Society of Phi Kappa Phi promotes the pursuit of excellence and the recognition of outstanding achievement. Membership is limited to the top students of each graduating class. Members wear a blue ribbon and a medallion bearing the symbolic seal of the society.

Student Ambassador Recognition and Honors
Students involved in the Student Ambassador Program have demonstrated outstanding campus leadership and have supported the growth of the university through outreach and community service. Ambassadors with 50 or more service hours graduate with Student Ambassador Honors. Students receiving honors recognition wear a blue and gold honor cord.

Doctor of Philosophy Degrees

College of Engineering and Mines

Dr. Douglas J. Goering, Dean

Erovie-Oghene Uyoyou-karo Afieroho
Ph.D. Petroleum Engineering, Economics, and Policy Management: Interdisciplinary Program
B.E., Ambrose Alli University, 1994; MBA, Pan-African University, 2005; M.S., University of Alaska Anchorage, 2010.
Thesis: Dying Intestate or with a Will on Toxic Estate? An Evaluation of Petroleum Fiscal Systems and the Economic and Policy Implications for Decommissioning of Onshore Crude Oil Fields in Nigeria
The knowledge frontier was extended through this study with introduction of (i) a methodology that determines cost of decommissioning petroleum fields; (ii) metrics for evaluation of vulnerability to decommissioning default risk, and (iii) the Fairbanks maturity model that demonstrates level of preparedness of a region for decommissioning its petroleum fields.
Major Professor: Dr. Shirish Patil

Nicholas T. Janssen *
Ph.D. Engineering: Mechanical Engineering
B.S., University of Wisconsin, Platteville, 2005; M.S., North Carolina State University, 2010.
Remote communities historically rely upon diesel fuel to energize their electrical grids, with cleaner wind power a recent trend. Strategies for the deployment of electric thermal storage devices as autonomous distributed secondary loads were developed in order to better utilize this wind energy while improving frequency regulation on the grid.
Major Professors: Dr. Rorik Peterson and Dr. Richard Wies Jr.
Rambabu Pothina **

**Ph.D. Engineering: Mining Engineering**
B.E., Kakatiya University, 2001; M.S., Pennsylvania State University, 2006.

**Thesis: Automatic Detection of Sensor Calibration Errors in Mining Industry**

Industrial sensor calibration errors are subtle, develop over time and are difficult to identify. Economic losses start accumulating even when errors are small. A data mining-based technique developed with Pogo Mine in Alaska that exploits intersensor relations in a multisensor environment is able to detect errors as low as 2 percent in magnitude.

Major Professor: Dr. Rajive Ganguli

College of Fisheries and Ocean Sciences

Dr. S. Bradley Moran, Dean

Dean L. Courtney **

**Ph.D. Fisheries**

**Thesis: Pacific Sleeper Sharks in the Northeast Pacific Ocean: Relative Abundance, Plausible Incidental Exploitation Rates, Trophic Ecology, and Habitat Use**

Pacific sleeper shark relative abundance indices were developed and incidental exploitation rates in commercial fisheries were evaluated to inform fisheries management. Baseline information about Pacific sleeper shark trophic ecology and habitat utilization was developed from analysis of stable isotope ratios and time series analysis of electronic archival tag data.

Major Professor: Dr. Milo Adkison

Ying-Chih Fang **

**Ph.D. Oceanography**
B.S., National Cheng Kung University, 2005; M.S., National Taiwan University, 2007.

**Thesis: Circulation and Dynamics on the Northeastern Chukchi Sea Shelf**

This dissertation analyzed radar-derived surface current measurements and velocity observations from subsurface moorings on the northeastern Chukchi Sea Shelf. Wind-induced surface and subsurface circulation patterns were determined, and circulation north of Hanna Shoal was found important for future studies of shelf-basin exchange.

Major Professor: Dr. Thomas Weingartner

Thomas Jean Farrugia **

**Ph.D. Fisheries**
B.S., McGill University, 2004; M.S., California State University, Long Beach, 2010.

**Thesis: Interdisciplinary Assessment of the Skate Fishery in the Gulf of Alaska**

Skates are common bottom-dwelling fishes and valuable nontarget species in Gulf of Alaska fisheries. An investigation of the ecology, population dynamics, nutritional content and bioeconomics of skates and their fisheries provided information about these understudied fishes, helping to improve the sustainability and profitability of skate harvests.

Major Professor: Dr. Andrew Seitz

* Summer degree recipient
** Fall degree recipient

May 5, 2018 9
Elizabeth Carroll Figus  

**Ph.D.  Fisheries**  

**Thesis: Using Local Knowledge to Inform Commercial Fisheries Science and Management in Poland and Alaska**  

This dissertation documents local knowledge of fishermen in Poland and Alaska, and advances methods for using that knowledge in fisheries management. Findings show how including local knowledge in fisheries management need not be limited to informal conversations or public testimony at meetings to be meaningfully interpretable by managers.  

Major Professor: Dr. Keith Criddle  

Sarah M. Laske *  

**Ph.D.  Fisheries**  

B.S., University of Illinois, Urbana Champaign, 2004; M.S., University of Wyoming, 2010.  

**Thesis: Surface Water Connectivity of Arctic Lakes Drives Patterns of Fish Species Richness and Composition, and Food Web Structure**  

Investigation of Arctic freshwater fish food webs led to the determination that access to a hydrologic network increased fish species richness and food web complexity in surface water-connected lakes compared to physically isolated lakes. Fish species functional traits and individual feeding strategies influenced in-lake assemblages and food web dynamics.  

Major Professors: Dr. Amanda Rosenberger and Dr. Mark Wipfli  

Sarah Beth Traiger *  

**Ph.D.  Marine Biology**  

B.S., University of California, Santa Cruz, 2010.  

**Thesis: Otters, Sea Stars, and Glacial Melt: Top-Down and Bottom-Up Factors that Influence Kelp Communities**  

Top-down and bottom-up factors affecting kelp in a glacial estuary were investigated. Kelp recruitment, fecundity and gametophyte competition were related to environmental factors, including sedimentation. Foraging pits and shell litter were evaluated as methods for determining clam predation. This research contributed to understanding the effects of glacial melt on kelp.  

Major Professor: Dr. Brenda Konar  

Jordan Thomas Watson **  

**Ph.D.  Fisheries**  

B.S., University of California, Santa Barbara, 2000; M.S., University of Washington, 2007.  

**Thesis: Quantifying Fisher Responses to Environmental and Regulatory Dynamics in Marine Systems**  

Commercial fishers are part of dynamic environments — physical, biological, management and economic considerations drive their behaviors through a set of complex interactions. We used a big-data approach to quantify how fishers responded to changes in fish abundance, water temperature and regulatory structures to optimize efficiency and yield.  

Major Professors: Dr. Franz Mueter and Dr. Alan Haynie
Leah Sloan Zacher  
**Ph.D.**  **Marine Biology**  
*B.S., California State University, Long Beach, 2009; M.S., Humboldt State University, 2012.*  
**Thesis:** Alaskan King Crab: Bering Sea Distribution and a Parasitic Castrator  
Sustainability of Alaskan king crab is of concern, especially with climate change. A parasitic barnacle can transform a king crab into a castrated “zombie crab.” Survival of the parasitic larvae under different environmental conditions, and metabolites in infected crab were studied. King crab distributions under different temperature regimes also were explored.

**Thesis:** “We Did Listen.” Successful Aging from the Perspective of Alaska Native Elders in Northwest Alaska  
A qualitative exploration of the phenomenon of successful aging as experienced by Alaska Native elders in Northwest Alaska revealed that family and community engagement, self-awareness and gratitude were essential. Successfully aging elders listen to their elders, enact their traditional values and practices, and share wisdom and knowledge with future generations.

Polly E. Hyslop

Ph.D. Indigenous Studies
Thesis: Circle Peacemaking in Kake, Alaska: A Case Study of Indigenous Planning and Dispute Systems Design
Circle peacemaking is a restorative practice designed by the people of Kake, a Tlingit community in Southeast Alaska. Based on local values, ancient laws and traditional knowledge, circle peacemaking has lowered the recidivism rate for wrongdoers in the community and pays close attention to the needs of the victims.
Major Professors: Dr. Beth Leonard and Dr. Brian Jarrett

Janice Jo DeVore Littlebear

Ph.D. Cross-Cultural Studies and Education: Interdisciplinary Program
Thesis: Teaching Through Culture in the K-12 Classroom
This study explored how experienced teachers use culture to deliver K-12 classroom instruction. Further, it developed and tested the effectiveness of a resource designed to inform about the use of culture to deliver classroom instruction. Five common themes emerged when teaching through culture: relationships, communication, connections, respect and multicultural resources.
Major Professors: Dr. Theresa John and Dr. Barbara Adams

Katrina Anne Rast

Ph.D. Clinical-Community Psychology
B.A., University of Alaska Fairbanks, 2011; M.S., University of Alaska Anchorage, 2014.
Thesis: Identifying and Working with Non-Responsive and Deteriorating Patients Within the Process of Supervision: Methods of Practicing Supervisors
The purpose of this study was to explore how supervisors identify and respond to deteriorating patients within the context of supervision. Results indicated that supervisors use tools contraindicated by clinical literature to identify deteriorating patients. However, their methods of responding to these patients coincide with common practices within psychotherapy.
Major Professor: Dr. Valerie Gifford

Charlene Barbara Stern

Ph.D. Indigenous Studies
B.A., Western Washington University, 2002; M.A., University of New Mexico, 2005.
Thesis: From Camps to Communities: Neets’aįį Gwich’in Planning and Development in a Pre- and Post-settlement Context
This dissertation focused on the Neets’aįį Gwich’in and their experiences with planning and development in a pre- and post-settlement context. Planning ahead, being prepared and adapting to changing conditions were key strategies that enabled the Neets’aįį to survive across generations in one of the harshest climates in the world.
Major Professors: Dr. Michael Koskey and Dr. Beth Leonard
Lexie Tom  
Ph.D.  Indigenous Studies  
Thesis: An Indigenous Teacher Preparation Framework  
An Indigenous Teacher Preparation Framework was created at Northwest Indian College as a result of this research. An Indigenous paradigm was used to design this qualitative research project. This framework, along with the teacher competencies and methods of measurement, aligns with the college’s overall vision of indigenizing institutional systems.

B.S., University of Alaska Anchorage, 1990; M.S., University of Alaska Anchorage, 2000.  
Thesis: Development of Acetylcholine-Binding Protein (AChBP) as a Biosensor for Serotonin Ligands  
Serotonin receptors are involved in nervous system disorders, and serotonin ligands are considered powerful therapeutic agents. We used acetylcholine-binding protein to engineer a soluble serotonin-binding protein. Our results contribute to multiple applications, including drug design and testing, high-throughput drug screening, and in-vivo and in-vitro screening of biologically active compounds.

Ph.D.  Biochemistry and Neuroscience: Neuroscience  

B.S., Bangalore University, 2007; M.S., Bangalore University, 2009.  

Thesis: Modulation of Ischemia-Reperfusion Injury in Mammalian Hibernators And Non-Hibernators: A Comparative Study  

Ischemia/reperfusion (I/R) associated with stroke and cardiac arrest are among the most frequent causes of debilitating neurological injury and death worldwide. This dissertation presents how obligate hibernators such as arctic ground squirrels may hold insight into possible interventions to ameliorate disorders characterized by I/R injury.

Major Professor: Dr. Kelly Drew

Douglas John Brinkerhoff **

Ph.D.  Geophysics  

B.S., University of Montana, 2009; M.S., University of Montana, 2012.  

Thesis: Bayesian Methods in Glaciology  

Bayesian inference was used to find the probability distributions of unobservable properties at a glacier bed, given a set of surface observations. These methods produced better estimates of subglacial topography, hydrology and ice velocity, as well as an improved understanding of their uncertainties.

Major Professors: Dr. Martin Truffer and Dr. Andreas Aschwanden

Ph.D.  Atmospheric Sciences  

B.S., Nanjing University, 2011; M.S., University of Kansas, 2014.  

Thesis: Global and Local Contributors to the Historical and Projected Regional Climate Change on the North Slope of Alaska  

Four contributing factors that result in regional climate change on the North Slope of Alaska are quantitatively explored and compared by numerical simulations. Global warming was found to be the leading contributing factor, while other factors primarily contribute to the spatial and temporal asymmetries of the regional climate change.

Major Professor: Dr. Vladimir Alexeev

Christina Seiman Chu *

Ph.D.  Space Physics  

B.S., Embry-Riddle Aeronautical University, 2010; B.S., Embry-Riddle Aeronautical University, 2010; M.S., Embry-Riddle Aeronautical University, 2010.  

Thesis: Hot Flow Anomalies at Earth’s Bow Shock and Their Magnetospheric-Ionospheric Signatures  

This dissertation presents statistical and case studies of hot flow anomalies (HFAs) identified in THEMIS satellite data from 2007-2009. The characteristics and occurrence of HFAs, their dependence on solar wind/interplanetary magnetic field conditions and location, and their magnetospheric-ionospheric signatures, have been investigated using in situ spacecraft observations and ground-based observations.

Dyre Oliver Dammann *

Ph.D.  Geophysics
B.S., University of Oslo, 2008; M.S., University of Alaska Fairbanks, 2011.

Thesis: Arctic Sea Ice Trafficability — New Strategies for a Changing Icescape
This work demonstrates an approach to improve knowledge of over-ice travel by outlining steps toward strategies capable of addressing key stakeholder needs. The result is a series of remote sensing techniques capable of evaluating critical parameters to ensure safety of sea ice operations and investigate potential implications of long-term change.

Major Professor: Dr. Hajo Eicken

Abraham Melesse Endalamaw *

Ph.D.  Atmospheric Sciences
B.S., Arba Minch University, 2005; M.P.S., Cornell University, 2009.

Thesis: Development of a Parameterization for Mesoscale Hydrological Modeling and Application to Landscape and Climate Change in the Interior Alaska Boreal Forest Ecosystem
This research addressed the limitations of modeling hydrological processes in Interior Alaska boreal forest catchments by simulating small-scale processes to regional-scale catchments via development of a small-scale landscape model. By developing a coupled climate-vegetation-permafrost-hydrology model, this study also quantified the impact of future climate on hydrological processes.

Louise Melanie Farquharson **

Ph.D.  Geology
B.S., University of Sussex, 2007; M.S., University of Alaska Fairbanks, 2012.

Thesis: Arctic Landscape Dynamics: Modern Processes and Pleistocene Legacies
To understand how the cryosphere will respond to warming, we need to understand landscape processes across a wide range of spatial and temporal scales. This dissertation uses a combination of field surveys, sedimentology, geochronology and remote sensing to explore Arctic cryosphere responses to climate change in the distant and recent past.

Major Professors: Dr. Daniel Mann and Dr. Vladimir Romanovsky

John Robinson Harley **

Ph.D.  Biochemistry and Neuroscience: Neuroscience
B.S., University of California, Santa Cruz, 2010.

Thesis: One Health Toxicology: Expanding Perspectives and Methods to Assess Environmental Contaminants
One Health is founded on the idea that environmental, wildlife and human health are intimately linked. The development and incorporation of novel technologies will expand the scope of One Health in order to better examine the impact of environmental contaminants on humans and wildlife in a changing world.

**Thesis: Vitamin D, Cognitive Function, and Oxidative Stress: Clues to Overtraining Syndrome?**
Endurance athletes are often stricken by overtraining syndrome (OTS), which is characterized by an unexplainable drop in athletic performance. OTS etiology remains unclear; the only known remedy is sustained rest. Our study revealed that vitamin D deficiency and oxidative stress marker HNE are associated with a drop in athletic performance.

**Thesis: Environmental Impacts on Guam’s Water Security and Sustainable Management of the Resource**
Impacts of climate change on freshwater resources of inhabited islands in the Pacific Ocean are of great concern. Utilizing historical data, evidence of change in water quality and access on Guam has been examined. Several indicators support the hypothesis that climate change trends are impacting Guam’s water security.

**Thesis: Causes and Consequences of Coupled Crystallization and Vesiculation in Ascending Mafic Magmas**
The explosivity of a volcanic eruption is governed by how easily gases migrate through and out of magma, along with the speed at which magma rises. This thesis explores the effect of crystals on the degassing process via laboratory experiments and analysis of eruption products from the Kasatochi 2008 eruption.

**Thesis: Hydroclimate in Eurasia from the Arctic to the Tropics**  
The research focused on the Arctic region and understanding how dams impact the river discharge and how climate variables such as snow and temperature change the discharge profile. The thesis also explores how recent rapid declines in sea ice could affect features of the tropical climate, particularly the Indian monsoon.

**Thesis: Detection, Source Location, and Analysis of Volcano Infrasound**  
Volcano infrasound is the study of sound from volcanoes, how volcanic processes produce it and the path it travels from source to receivers. We evaluated a common source-location technique in the presence of topography, characterized gas-jetting fumarole acoustics and developed a technique to estimate the back-azimuth to acoustic sources.

**Thesis: Optimizing Landbird Surveys for Detecting Population and Spatial Dynamics**  
The following were developed to increase the sensitivity of landbird monitoring programs for detecting population and spatial dynamics: a spatial-distance sampling model that accommodates temporary emigration and a multistate, time-removal model for inventorying and monitoring cliff-nesting raptors. Lastly, interannual variation in arrival timing was investigated for sub-Arctic-breeding passerines.

Thesis: The Snowshoe Hare Filter to Spruce Establishment in Boreal Alaska  
Snowshoe hare herbivory and spruce establishment in boreal Alaska were explored. Snowshoe hare act as a spatially aggregating force to spruce establishment, where the potential for optimal spruce regeneration is highest during periods of low hare abundance and where hares are absent from the landscape.

Field surveys and space-for-time substitution modeling were used to explore the effects of long-term reductions in lake size on lake-margin wetlands of the Yukon River floodplain. Lake shrinkage influenced the exchange of water, organic matter, and nutrients between lakes and wetlands, and significantly affected wetland biodiversity and carbon storage.

Sets of hybrid (kinetic ion/fluid electron) plasma simulations of the Rayleigh-Taylor instability and the Io flux tube using conditions similar to the magnetosphere of Jupiter are presented. Both the Io torus and the planetary magnetodisc act as resonant cavities for interacting waves, which creates turbulence and generates aurora at Jupiter.

Thesis: 60,000 Year Climate and Vegetation History of Southeast Alaska  
Pollen in sediment cores and stable isotopes from speleothems were used to reconstruct vegetation and climate of coastal Southeast Alaska during the last glacial/interglacial transition. Continuous stalagmite growth indicates areas free of ice, and appearance of tree pollen immediately following deglaciation suggests proximity to ice age forest refugia.

The U.S. tight oil revolution provides a template for other aspiring regions with similar resources. Lessons that the U.S. experience could provide to other aspiring regions were examined using econometric and petroleum engineering techniques. Case studies of successful U.S. plays and regulations suggest solutions for tight oil development challenges.

Mr. Jacob Anaġi Adams Sr. began working to improve the lives of the people of the North Slope when he was a young man. Today, after decades of service, his accomplishments in business, civics and education can be seen across the State, to the benefit of all Alaskans.

Mr. Adams, born in Barrow, grew up in a family of 12 children. As a young boy, he participated in bowhead whale hunts, and he has continued that tradition his entire life. After graduating from Mount Edgecumbe High School in Sitka and taking college classes at UAF and elsewhere, Mr. Adams returned to the North Slope. At 21, he was elected to the Barrow City Council. A few years later, he became the City’s mayor.

In the decades that followed, Mr. Adams participated in the creation of entirely new laws, institutions and organizations to serve the Inupiat.

Mr. Adams advocated for the Alaska Native Claims Settlement Act of 1971, then became a board member for the Arctic Slope Regional Corp., which received land and money in that settlement. He served as ASRC’s chief executive from 1983 to 2006, guiding its growth into Alaska’s largest state-based company. Mr. Adams also was elected to the North Slope Borough’s first assembly after its creation in 1972, and he later served as the Borough’s mayor. When, in 1977, the International Whaling Commission banned bowhead whale hunting, Mr. Adams worked to create the Alaska Eskimo Whaling Commission and helped reverse the ban. Mr. Adams, also in 1977, helped create the Arctic Education Foundation, which provides financial assistance for students pursuing degrees or certificates. He is a current member of the Barrow Whaling Captains Association, and he volunteers with Barrow Search and Rescue.
Leader, teacher and culture bearer

Antonia Loretta Afraid of Bear-Cook

Ms. Antonia Loretta Afraid of Bear-Cook is an Oglala Lakota spiritual teacher and advocate whose efforts on behalf of Indigenous peoples have been recognized across the globe.

Ms. Afraid of Bear-Cook grew up on the Pine Ridge Reservation in South Dakota, where she didn’t learn English until she was seven years old. She studied Lakota language, spiritual traditions and ceremonies with her grandfather, and since then she has practiced these and shared them widely. She generously opens her family’s Sundance ceremony to others, and it has become a gathering point for Indigenous and non-Indigenous leaders. Ms. Afraid of Bear-Cook has led classes, lectures and workshops on Lakota culture around the world, including in England, Australia, Mexico, Chile, Canada and Belgium. Ms. Afraid of Bear-Cook also has been active in numerous tribal and nonprofit organizations, including the Mohawk Nation at Akwesasne, to which her husband, Tom, belongs.

Ms. Afraid of Bear-Cook helped champion changes in federal policy that led to passage of the 1975 Indian Self-Determination and Educational Assistance Act and the 1978 American Indian Freedom of Religion Act, as well as 1994 amendments to AIFRA that protect peyote use in the Native American Church. In recent years, she has continued to advocate on multiple fronts — working to rescind the 1493 papal bull that decreed the Americas belonged to Spain and Portugal, seeking a peaceful and respectful resolution of the dispute over the Dakota Access Pipeline, and promoting the return of the Black Hills to Indigenous tribes.

Ms. Afraid of Bear-Cook currently serves on a doctoral degree committee for the UAF Indigenous studies program, and she has invited graduate students to participate in Lakota ceremonies, thus sustaining longstanding ties between UAF and her community.
Musician, songwriter and Alaska ambassador

James Milton Varsos

Mr. James Milton Varsos, better known as Hobo Jim, is a legendary musician who has shared his portraits of Alaskans and their lifestyles throughout the State, nation and world. During his more than 45 years in Alaska, he has become one of the most well-known ambassadors for the State and its unique people, lands, institutions and industries.

Born and raised in the Midwest, Mr. Varsos hitchhiked to Alaska as a young man. At 18 years old, he played his first gig at the Bear Den, later named BJ’s Lounge, in Soldotna.

Since then, his original songs about commercial fishing, sled dog racing, logging, construction and working on the trans-Alaska oil pipeline have vividly evoked the way people live and make a living in the northernmost state.

Mr. Varsos has written more than 600 songs. He owns Hobo Jim Publishing in Nashville, Tennessee, and has produced dozens of records for himself and other artists.

His work has been recorded by some of the most prominent musicians in the nation, including George Jones, Etta James, Janis Ian and Randy Travis. He has opened or toured with, among others, Reba McEntire, Ted Nugent, Ricky Skaggs, Riders in the Sky, Chubby Checker, John Lee Hooker, Steppenwolf, and Jefferson Airplane/Starship. As a professional songwriter, he has worked for Warner Brothers, MCA, Famous Music and Balmur Publishing.

Mr. Varsos has performed in Washington, D.C., during presidential inaugurations and draws large audiences in Australia, Japan and Germany.

Despite his international renown, Mr. Varsos has continued to perform annually for dedicated fans in small venues throughout Alaska.
Ms. Althea St. Martin has volunteered and worked in many fields during her almost forty years in Fairbanks, applying her can-do attitude to the community’s needs in myriad ways.

Ms. St. Martin drove a Ford F-150 to Fairbanks in 1979 for a year-long sabbatical from her job as a special education teacher in Michigan. Her early work here included stints as a cocktail waitress, mining camp cook and health club assistant manager. After joining the Greater Fairbanks Chamber of Commerce to direct member services, Ms. St. Martin found herself promoted to acting president. From there, she joined the University of Alaska Fairbanks as alumni relations director. She then worked as a financial planner through the 1990s until U.S. Senator Frank Murkowski asked her to run his Fairbanks office. When the senator became governor and was succeeded by his daughter, Senator Lisa Murkowski, Ms. St. Martin continued in the job until retiring in 2014. During this busy professional career, she volunteered with the Rotary Club of Fairbanks, Festival Fairbanks, Big Brothers Big Sisters, United Way, the Republican Women of Fairbanks, the Chamber and the Hospice of the Tanana Valley, among other organizations. A master gardener, she has shared both produce and cultivation tips with innumerable friends, acquaintances and people in need.

In recognition of her many years of public service, the University of Alaska Fairbanks expresses its deep appreciation to Ms. Althea St. Martin and presents her with this Meritorious Service Award.
Academic Traditions

For centuries, pomp and circumstance have added color and dignity to the recognition of scholastic achievement. Modern academic dress evolved from caps and gowns worn in medieval universities, which were agencies of the church. Academic gowns distinguished university personnel from townspeople who also wore gowns for daily dress. The costumes of doctors and lesser clerics were not as elaborate as those prescribed for officials, but they were distinctive nonetheless. Through the centuries, the traditional pageantry has not changed much. In ancient times, each individual scholar wore special colors, fur and fabrics, as did his students. Since the traditions began, however, official standards allow the observer to identify more about the scholar.

Gowns

Three types of black gowns may be distinguished in UAF’s academic procession. Certificate, associate and baccalaureate gowns have long, pointed sleeves. Master’s gowns have oblong sleeves with an arc cut away in the front. Doctoral gowns are faced with velvet and have bell-shaped sleeves with three bars of velvet.

Hoods

UAF’s master’s and doctoral degree candidates will receive their hoods today, signifying they have gone beyond the bachelor’s degree to a higher level of academic achievement. UAF’s colors are blue and gold, and these colors line the inside of each hood. The velvet trim signifies the scholar’s field of study.

Mortarboards

The square Oxford cap, or mortarboard, is black and has a long tassel fastened to the middle of the top. You may notice the University of Alaska regents and some of the faculty wearing soft beret-style caps. Some colleges and universities use the soft beret, but the prevailing style of cap is the traditional mortarboard. For undergraduates receiving their first degree, the tassel is customarily worn on the right side and shifted to the left after receiving the diploma. At many institutions, colored tassels are worn to indicate the candidate’s school or college. At UAF, a blue and gold tassel is worn on the cap for all certificates and associate, baccalaureate and master’s degrees, and gold tassels are worn for all doctoral degrees.

While you may not be able to identify the origins of each specific academic robe and hood appearing in today’s commencement ceremony, you can reflect that from the certificate recipient in a simple black gown to the doctor of philosophy in a velvet trimmed robe and colorful hood, students and professors alike are paying homage to more than 700 years of academic tradition.
An academic legend tells of a wise old Greek who dressed his students in mason’s sackcloth robes and mortarboards because, he said, “Their destiny is to build. Some will build cities; some will build lives — perhaps one of them will build an empire; but all will be builders on the solid foundation of knowledge.”

**Chancellor’s Medallion**

During the Middle Ages, medallions signified membership in religious orders and workers’ guilds and, in the Renaissance, membership in elite orders of knighthood and prominence in government office. Today, colleges and universities strike medallions to commemorate important events and achievements or to designate a person of consequence. The UAF chancellor’s medallion signifies the authority vested in the chancellor.

The chancellor wears a metal alloy medallion designed in 2016 by Todd Sherman, a professor of art and dean of UAF’s College of Liberal Arts. The medallion features the head of a polar bear — a nanook — based on an art piece also made by Sherman. The medallion is the result of a collaboration between Sherman, computer art student Lucas Cheek ’14, Library Graphic Designer Emeritus Dixon Jones and Eric Johansen ’85, a mechanical technician in the College of Engineering and Mines. Gwich’in Athabascan artist Dixie Alexander used dentalia shells, glass pony beads, crow beads and smoke-tanned moosehide to create the neckpiece that holds the medallion.

**University Mace**

Bodyguards of French and English monarchs carried ceremonial war clubs, or maces, in the Middle Ages. Later, the mace became an important symbol of office in civil processions and academic pageantry. The grand marshal carries the University of Alaska mace in the commencement procession and places it in a stand on the stage during commencement ceremonies to signify the importance of the occasion.

The mace was commissioned by the University of Alaska Alumni Association in honor of the university’s 1967 golden anniversary and was created by UAF Professor Emeritus Ron Senungetuk using silver, jade and rosewood. At the top of the mace, a disk in the center of two open orbs depicts the University of Alaska seal on one side and the Alaska state seal on the other. The materials were selected to symbolize qualities of durability, strength and beauty.
