**NSF Funding Improvements in Undergraduate Geoscience**

The Directorate for Education and Human Resources is funding investments into schools’ geoscience programs to engage and retain undergraduate students in geoscience fields and help prepare them for careers.

This grant provides between $300,000-$500,000 (depending on funds) for a period of 3 years to attain and retain more geoscience undergraduate students. It also is intended to fund effective training for the workplace, to ensure these graduates can utilize their knowledge effectively. Awardees are **strongly encouraged** to involve underrepresented groups in their enhanced geoscience fields, specifically **women**, **disabled persons**, **military veterans**, **Alaska natives**, **Hispanics**, and **African Americans**.

Letters of intent are required and are due by August 8th 2017. Full proposals are due October 10th 2017.

*The Directorate for Education and Human Resources is a division of the National Science Foundation.*
