Articulation Agreement
2015-2016

University Alaska Fairbanks  Southwest Region School District
Bristol Bay Campus  PO Box 90
PO Box 1070  Dillingham, Alaska 99576
Dillingham, Alaska 99576

Purpose:
In addition to the current Tech Prep Agreement between University of Alaska Fairbanks and Southwest Region School District, we have agreed to add the following course that is within UAF Construction Trades Technology Program:

1. Southwest Region School District will follow a UAF Construction Trades Technology curriculum in coordination with the administration and faculty of the University of Alaska Fairbanks pertaining to the following courses on the course below.
2. Southwest Region School District will teach for the attached outcomes.
3. The attached syllabus will follow the learning outcomes of the university-approved course listed.

4. The attached syllabus will be followed.
5. Southwest Region School District will provide necessary support for students to be successful in this course which may include computer support, reference books and academic assistance.
6. Bristol Bay Campus will process the registrations.
7. In order to receive concurrent credit, the student will register for the Tech Prep class during the semester in which the competencies will be completed.

CONSTRUCTION TECHNOLOGY CORE
COURSE OUTLINE

Course Title: Construction Technology Core
Course No: CTT 100
NCCER Module/s No.: 00101, 00103- 00105
Credits: 3
Prerequisites: None
Instructor: Greg Cejka
Location: Togiak, AK
Dates: 01/11/2016 – 05/20/2016
Times: Monday-Friday
50 minutes a day
Office: Office hours: available on first day of class

COURSE DESCRIPTION:
This course introduces basic construction techniques using OSHA approved standards by stressing how to follow safe work practices and procedures, how to safely use hand and power tools, and how to extract information from construction drawings.

This course is divided into four (4) modules. Each module must be successfully passed. Generally, each module will have two (2) components. All will have a written portion including a final exam. Most modules will require hands-on demonstration of achieved competencies related to the module.

***********************
Basic Construction Safety
NCCER Module No.: 00101 –Basic Safety

Module Description:
This module introduces basic construction safety using OSHA approved standards by stressing how to follow safe work practices and procedures, proper inspection of safety equipment before use, and the proper use of safety equipment.

Learning Objectives:
Upon successful completion of the module, the participant will be able to:
1. Identify the responsibilities and personal characteristics of a professional craftsperson.
2. Explain the role that safety plays in the construction crafts.
3. Demonstrate the use and care of appropriate personal protective equipment.
4. Describe and demonstrate safe behavior on and around ladders and scaffolds.
5. Describe fire prevention and fire-fighting techniques around a construction site.
6. Explain the importance of the HazCom (Hazard Communication Standard) requirements and MSDSs (Material Safety Data Sheets)
7. Define safe work procedures around electrical hazards.

(Rev 12/18/2015)
Performance Objectives:
Under the supervision of the instructor, the trainee should be able to:
1. Inspect personal protective equipment (PPE) to determine if it is safe to use
2. Properly don and remove personal protective equipment

Module Content:
1. The Craft Professional
2. Causes of Accidents on the Construction Site.
4. Construction Site Job Hazards.
5. Working Safely with Job Hazards.
6. Personal Protective Equipment.
7. Aerial Work.
10. Electrical Safety.

Introduction to Hand and Power Tools
NCCER Modules No.:  00103-Introduction to Hand Tools
                     00104-Introduction to Power Tools

Module Description:
These modules introduce basic hand and power tools used in construction and maintenance and stress the importance of their care and use. They provide valuable safety information for each type of tool discussed. Understanding proper usage helps trainees to prevent accidents. They, also, introduce some specialty tools used by different crafts.

Learning Objectives:
Upon completion of the modules, the participant will be able to:
1. Recognize and identify some of the basic hand tools used on the construction site.
2. Use these tools safely.
3. Describe and demonstrate the proper procedures for taking care of these tools.
4. Identify commonly used power tools of the construction and carpentry trade.
5. Demonstrate correct and safe use of the power tools.
6. Demonstrate proper maintenance of power tools.

Performance Objectives:
Under the supervision of the instructor, the trainee should be able to:
1. Visually inspect commonly used hand tools to determine if they are safe to use
2. Safely and properly use commonly used hand tools
3. Safely and properly operate an electric drill
4. Safely and properly operate a circular saw
5. Safely and properly operate a bench grinder
6. Safely and properly a portable belt sander
7. Safely and properly operate a pneumatically powered nailer (nail gun)

(Rev 12/18/2015)
Module Content:
1. Hammers.
2. Screwdrivers.
4. Ripping Bars and Nail Pullers.
5. Wrenches.
6. Pliers and Wire Cutters.
8. Vises and Clamps.
12. Grinders, Sanders, and Air Nailer.

Introduction to Blueprint Reading
NCCER Module No.: 00105-Introduction to Blueprint Reading

Module Description:
This module introduces basic blueprint terms, components, and symbols. It presents different types of construction drawings commonly used on job sites and describes why each type of drawing is important. This module covers standardized information contained on blueprints such as identification, revision status, symbols, project titles, dimension, and scale.

Learning Objectives:
Upon completion of the module, the participant will be able to:
1. Recognize and identify basic blueprint terms, components, and symbols.
2. Relate information on blueprints to actual locations on the print.
3. Recognize different classifications of drawings.
4. Interpret and use drawing dimensions.

Performance Objectives:
Under the supervision of the instructor, the trainee should be able to:
1. Extract requested information from a set of construction drawings

Module Content:
1. Introduction to Blueprints.
2. Components of the Blueprint.
3. Scale Drawings.
4. Lines of Construction.
5. Abbreviations, Symbols, and Keynotes.
6. Using Gridlines to Identify Locations.
8. Dimensions.

(Rev 12/18/2015)
9. Layout of Common Structure

**Method of Grading for Complete Course:**

Pass/fail _______ Letter Grade _______ X _______ other _______ (explain)

Grade will be based on the following:
- Attendance 20%
- Lab/Participation 30%
- Examination 40%
- Skill Mastery 10%

**Course Grading Requirements:**

A letter grade will be issued for participants who successfully complete the course.
Written tests will be given at the end of each section to test the knowledge of the participant.

Letter grade criteria:
- 91 to 100% = A letter grade
- 81 to 90% = B letter grade
- 71 to 80% = C letter grade
- 60 to 70% = D letter grade
- Less than 59% = F letter grade

**UAF Disabilities Services for Distance Students**

UAF has a Disability Services office that operates in conjunction with the College of Rural Alaska's (CRA) campuses and UAF's Center for Distance Education (CDE). Disability Services, a part of UAF's Center for Health and Counseling, provides academic accommodations to enrolled students who are identified as being eligible for these services.

If you believe you are eligible, please visit [http://www.uaf.edu/ehc/disability.html](http://www.uaf.edu/ehc/disability.html) on the web or contact a student affairs staff person at your nearest local campus. You can also contact Disability Services on the Fairbanks Campus at (907) 474-7043, lvdso@uaf.edu.

**Facilities Required:**

Classroom capable of seating 15 participants with comfortable chairs and work tables/desks, overhead projector/LCD projector, wipe boards, TV Monitor and VCR, marking pencils, and standard instructional equipment.

**Lab Supplies Required:**

Lab equipment will consist of various PPE, drawings, hand and power tools, and miscellaneous building materials and fasteners.

**Textbook & Materials**
