

Vegetables and Herbs 1998

by

Grant Matheke and Pat Wagner and Pat Holloway

The family food garden contains a wide variety of vegetables and herbs that can be grown in interior Alaska and shows some of the cultivation techniques necessary for optimum production. Cultivars include several developed at the Agricultural and Forestry Experiment Station in Fairbanks and Palmer; standard cultivars that have proven reliable in home gardens and commercial businesses; and new promising cultivars. Recent All America Selections winners are also grown here. Some vegetables such as carrots and beans are direct seeded in late May. Others are started in our greenhouse and transplanted into the garden the first week of June. This year we are conducting special trials with spinach and yellow wax beans for Denali Seed Company, Anchorage. Special thanks to the following seed companies for providing free seeds for our trials: Ball Seed Co., Geo. W. Park Seed Co., Stokes Seeds, Johnny's Selected Seeds, Denali Seed Co., and Bakker Brothers Seeds. (No endorsement of firms mentioned is intended, nor is criticism implied of those not mentioned.)
