

Student Learning Outcomes Assessment Summary

Department of Atmospheric Sciences, MS

College of Natural Sciences and Mathematics

AY2016, AY2017, AY2018

Submitted by: Department of Atmospheric Sciences

Contact Information: B. D. Day

Date: 4/24/2018

1. Assessment information collected

In AY2016, three students graduated with a MS degree in Atmospheric Sciences. 100% continued in our PhD program. As all of them were also enrolled in the PhD program to continue their education at UAF no data were collected for the comfort of these three students as they might have conflicts of interest at that point.

2. Conclusions drawn from the information summarized above

The fact that the MS graduates chose to continue their education for a PhD in our department vs. going somewhere else leads to the conclusion that they valued the education, training, and research experiences they had received during their tenure as MS students in the department.

3. Curricular changes resulting from conclusions drawn above

N/A see above.

4. Identify the faculty members involved in reaching the conclusions drawn above and agreeing upon the curricular changes resulting

N/A

5. Has your SLOA plan been updated to include assessment of the program's Communication Plan, as required by Faculty Senate motion?

No. This [plan](#) addresses BS programs. This program is a MS Program.
