

Community Health A.A.S degree		College of Rural and Community Development			
Table 4.1 Outcomes Assessment Implementation Summary					
	Academic Year				
	2010-11	2011-12	2012-13	2013-14	Fall 2014
Assessment information collected					
Number of General education and CHP 200 courses taken*		33	30	44	20
Number of AAS degrees	1	6	6	7	May 2015
* Data from advising and Denali grant support for courses: tuition, fees and books. Does not include students who took courses with other financial aid.					
Conclusions drawn from the information collected above and how are faculty collectively involved in drawing conclusions	<u>Intended Outcome:</u> A flexible delivery system for meeting the needs of the Community Health Practitioners for home based study. <u>Assessment Criteria:</u> UAF/CRCD will offer multiple courses in each general education category per semester by appropriate technology for students to take in their rural community. UAF will offer at least one 200 level CHP or Health (HLTH) course each semester by appropriate technology for students to take in their rural community. <u>Conclusion:</u> The number of UAF general education and CHP 200 level courses are adequately available for CHPs to complete the AAS degree. A critical factor is financial aid support for these part-time students.				
Curricular changes resulting from conclusions drawn above	No curricula changes. Continue providing individual student advising to all participants at the annual CHAP statewide meeting and during basic training sessions through TC faculty. Also continue to produce and distribute each semester advising materials and information on distance courses for CHAs/CHPs to take for the AAS degree (sent to all 180 village clinics and 26 health corporation staff). <u>Program Need:</u> Create a survey that measures student satisfaction with the additional AAS degree coursework administer to graduates since 2010. Update the guide/booklet for CHAP students and faculty “How to Complete My AAS Degree”. Use data and quotes again from student survey.
