

Table 4.1 Outcomes Assessment Implementation Summary

Complete a separate table for each degree and certificate program

	Academic Year				
	Fy '10	Fy '11	Fy '12	Fy '13	Fy '14
Assessment information collected*:					
Headcount of Certificate	13	16	24	18	12
Number of Certificates Awarded	13	5	19	13	12
* Need data on number of students completing CHP 135. Question the PAIR data on headcount of majors and degrees awarded.					
Conclusions drawn from the information collected above and how are faculty collectively involved in drawing conclusions	<p><u>Intended Outcome:</u> Community Health Practitioners employed by any tribal health corporation throughout the state will receive a UAF Certificate in Community Health upon completion of the CHP 131-135 course series.</p> <p><u>Assessment Criteria:</u> 90% of the graduates will express overall satisfaction with the Community Health courses of study.</p> <p><u>Conclusion:</u> The goal is that 100% of Community Health Practitioners employed by a tribal health corporation will receive a UAF Certificate in Community Health. Data needs research as to why the change in results/data from the 2010 program review.</p>				
Curricular changes resulting from conclusions drawn above	<p>No curricula changes.</p> <p>Continue providing orientation for the special* UAF CHAP course registration, admission and graduation processes to tribal health organizations and CRCD rural campuses.</p> <p>Key: Research the fy '11, '12 and '13 data for the discrepancies and correct awarding of certificates.</p> <p>* Since the training is done at tribal health training centers (not through a UAF campus) CHAP has its own UAF registration form, fee payment and grading processes.</p>
