Publication Date: 2013

Course Description:

This is the first in a two-semester sequence in oral communication required for the B.S. degree in Chemistry. Together, these two courses provide an introduction to the techniques and style of technical oral presentation generally accepted by professional chemists. Class will meet two hours per week, the first hour is open session, and the second is closed session. Chem 481 students are required to attend all of the public seminars (Tuesdays, sometimes Thursdays) and participate in critiquing presentations by graduate students, chemistry faculty, and their peers during the Thursday session. Note: The oral communication intensive credit is earned upon successful completion of both CHEM F481 and Chem482.

Course Goals:

Develop an overall understanding of the principles of oral communication in science including accepted presentation techniques, listening skills, critical analysis of scientific presentations, participation in scientific discussions and introduction of speakers and invited guests.

Learning Outcomes

1. Demonstrate an ability to listen to a scientific presentation and to ask pertinent questions regarding the material presented.
2. Demonstrate the ability to critically evaluate the research presented in a peer-reviewed article and to answer questions posed by the audience on this research at the end of the presentation.

3. Actively participate in a discussion of strengths and weaknesses of a speaker's presentation and/or the scientific merit of the research presented.
4. Provide clear concise written critiques of research and/or journal presentations with respect to presentation style, multimedia and content.
5. Demonstrate the ability to introduce a seminar speaker in a professional and appropriate manner as described by the course directors.

Instructional Methods:

Chem 481 students are required to attend all class sessions and participation in all class activities. Students will be expected to listen to all presentations during the Tuesday public seminar session and to ask relevant and probing questions during the question/answer period. In addition detailed, written critiques of all presentations will be required and all Chem 481 students will be expected to attend and participate in the discussion of these critiques during the Thursday closed session.

To provide some public speaking experience in Chem 481, students will be required to write and deliver a public introduction for seminar speakers at least once during the semester and to participate in any public speaking exercises conducted during the semester.

Course Policies:
