

Project 2025: What it says about education and why it matters

Project 2025 says, "...the federal Department of Education should be eliminated." Other language proposes to reduce or eliminate numerous protections for a variety of people and reduce enforcement for sex-based discrimination and civil rights violations. Dr. Carol Gray will examine the plan's language and discuss its potential effects on public school funding, loan forgiveness, Head Start, and more.

RSVPs are appreciated, but not required. Please contact Carol Gray at cjgray5@alaska.edu.
