Articulation Agreement
2017-2018

University Alaska Fairbanks
Interior Alaska Campus
4280 Geist Road
Fairbanks, Alaska 99709

Alaska Gateway School District
PO Box 226
Tok, Alaska 99780

Purpose:
In addition to the current Tech Prep Agreement between University of Alaska Fairbanks and Alaska Gateway School District, we have agreed to add the following course that is within CRCD Welding (WMT) program.

1. Alaska Gateway School District will follow a UAF WMT curriculum in coordination with the administration and faculty of the University of Alaska Fairbanks pertaining to the following courses on the course below.
2. Alaska Gateway School District will teach for the attached outcomes.
3. The attached syllabus will follow the learning outcomes of the university-approved course listed.

1. The attached syllabus will be followed.
2. Alaska Gateway School District will provide necessary support for students to be successful in this course which may include computer support, reference books and academic assistance.
3. Interior Alaska Campus will process the registrations.
4. In order to receive concurrent credit, the student will register for the Tech Prep class during the semester in which the competencies will be completed.

Class Location: Tok School, Tok, Alaska

Prerequisite: none

Dates/Times: Sept 18-Feb 18, 2017
Monday-Friday
Feb 5 - May 21, 2018
May 2018 Certification Testing

Texts/Materials: AWS Welding Volume 1
AWS Welding Volume 2

Text Author: National Center for Construction Education and Research
(NCCER)

Text Publisher: Prentice Hall

Course Description:
Entry-level course in Welding Safety, basic oxyacetylene welding/cutting, GTAW, and SMAW. This course is designed to
introduce students to some of the fundamental tools, equipment, materials, and processes used in the various fields of welding. The course is designed around workplace safety and job readiness skills. Students will gain knowledge about career opportunities, requirements, and the development of basic skills that will help prepare them for success.

Course Goals:

Students will develop welding proficiency in position 1 and 2 using the two welding processes, oxyacetylene welding, and SMAW. Students will be expected to pass a position certification test in at least one welding process at the end of the school year. Student will be expected to pass all module testing with a 70% or above.

Student Learning Outcomes
Students will be able to:
1. Demonstrate work safety in the welding shop according to instructor, school, and OHSA regulations.
2. Demonstrate proper oxyacetylene, and SMAW safety and setup.
3. Demonstrate proper oxyacetylene welding/cutting, and SMAW welding procedures and techniques.
4. Demonstrate sufficient knowledge of oxyacetylene, SMAW systems and materials used through module testing.

Instructional Methods:

The basic welding/cutting concepts will be developed through a variety of instructional methods. They include:
1. Assigned class readings from course text.
2. Instructor led class discussions.
3. Informational/instructional Videos
3. Instructor led demonstrations
4. Student led exploration
5. Small group instruction
6. Individual instruction

Course Subject Breakdown

General Shop Safety Testing 15 hrs
Oxyacetylene Safety 6 hrs
GTAW Safety 5 hrs
SMAW Safety 6 hrs
Oxyacetylene Welding/Cutting Instructional 12 hrs
Oxyacetylene Skill Development 17 hrs
GTAW Instructional 10 hrs
GTAW Skill Development 18 hrs
SMAW Instructional 15 hrs
SMAW Skill Development 30 hrs
Testing prep and Testing 11 hrs
Total 145 hrs

Grading Breakdown
1. Student Participation/Reviews (includes class activities) 70%
2. Test/Quiz 30%

A=90% to 100%
B=80% to 89%
C=70% to 79%
D=60% to 69%
F= 59% and below
