

ARTSci TEEN Workshops

Discover a new skill. Register for a single workshop or the whole series.

Aurora Art, February 22 • 1-2:30pm

Explore the science and stories behind the aurora and make art inspired by the northern skies. See and hear the aurora in the galleries. Watch a science demonstration. Learn a new art technique.

This event coincides with a no school day for the Fairbanks North Star Borough School District.

Gyotaku, March 6 • 4-5:30pm

Discover the Japanese art of fish printing. Learn about fish anatomy and how art can be a record of our world. Go beyond the basics to discover the fine art of nature printing. Make your own prints using block printing ink.

Faux Taxidermy, March 30 • 4-5:30pm

Make animal specimens using art materials. Investigate animal morphology and learn about adaptations. See museum specimens and hear about how they are prepared and preserved.

For ages 13-18. Parents/guardians must sign a registration form.
No experience necessary. Instructions and materials will be provided.

Cost: \$20 (non-members), **\$15** (UAMN members)
Pre-registration required. Space is limited.
