# UAF Brown Bag Professional Development Series Presents:

Password:

Fried Phish

Are you frequently caught by surprise by fraudulent emails? Maybe you pride yourself in passing OIT's phishing tests. Either way, learning more about phishing behavior could help you protect yourself and UAF.

OIT systems engineer Caleb Severn presents "Fried Phish: Bad for the Health of your Organization." Bring your lunch and learn how scammers use emotion, etiquette, prejudice and technology to trick people. Learn how to prevent fraud in person, on the phone and over email. Have fun acting out attacks and joking about human social behaviors.

O'Neill 201 • Monday, August 20th • 12–1:00pm
