Please use your UA email for all communication regarding this class

Course Description: This course is designed to provide students with the fundamental skills needed to lead a group of individuals in a backcountry environment. Throughout the semester students will develop their technical skills, group management techniques, risk assessment tools, and much more. Course material will focus on current theories and principles used in the outdoor recreation and education field. The development of a student’s hard skills (equipment use, navigation, shelter construction, etc.) and soft skills (leadership, group management, decision making, etc.) will assist in the development of the student’s character. The course includes three separate hiking/backpacking trips with one day trip. These trips require that students to be prepared physically and mentally.

Course requirements: A significant portion of the course will be spent in the field, thus students must be in good physical condition and prepared physically to hike on rough terrain with a heavy pack for long days. Technical gear such as tents, packs, stoves and sleeping bags are available for free through the Outdoor Adventures office; however the student must provide footwear and personal clothing. This course is designed with the intention of training students to lead wilderness trips in a variety of situations including through the Outdoor Adventures office.

Course goals: Students should leave with the ability to lead a group of their peers into the backcountry, provide a fun and educational experience to them and return them safely at the end of this trip. Students should be able to begin to master this demanding and dynamic skill. Students will have the opportunity to grow and learn through a series of challenging experiences.

Teaching Style: This course will combine lecture, group discussions, and hands on activity that will allow us all to learn from each other. This shared learning experience will often require you, the student, to lead the discussion or teach a topic based on your experience. we will provide the student with information and skills that will be put to use right away in an actual field environment. Students should come to class prepared to work, discuss, move around and be outside.

Class Meetings:
Brooks 104B
Tuesday and Thursday from 2:00-3:30
Classes run September 3- December 5
Overnight Field Experiences: September 14-15, October 5-6 or October 26-27
The overnight trips start early Saturday morning and don’t return until just after dinner on Sunday night.
Grading Policy
NRM 161 is worth 3 credits and each student will be assigned a letter grade.

A = 90+
B = 80 – 89
C = 70 – 79
D = 60 – 69
F = Below 60

Attendance and Participation 100
Paper 1 100
Paper 2 100
Quiz 1 50
Field Experience 300
Final 100
Total 750 possible points

Required Texts and Supplies:
One of the following:
• Compass
• Journal

Supplemental readings provided by the instructors

Assignment descriptions
Attendance and Participation (100 points = roughly 4 points a day)
Students are required to show up to class on time and ready to participate in the dynamic lessons being taught each day. Because each piece of information is crucial to a group’s safety, it is important to be present for every class period. Each unexcused absence results in a loss of 4 points.
Journal entries from trips will count toward this grade as well.

Paper 1 Risk Management (100 points) *DUE October 15th
Look at “Adam’s Story”. (Hand-outs provided) Write a 2 page paper analyzing the accident. What went wrong? What went right what would you have done differently? What can be done to avoid a similar incident in the future? Use the concepts learned in class to form your opinion. The report should use APA format.

Paper 2 (100 points) * DUE November 19th
Students will be given the journal article “Social Justice in Outdoor Experiential Education: A State of Knowledge Review”. Students will write a 2-3 page reaction to this article as well as uses at least 2 other sources addressing social issues within Outdoor Education. Students should include their own personal reaction to the paper as well as include sources that back up claims made about the article or subject matter. This paper should be written in APA format.

Field Experience (100 points each)
September 14-15, October 5-6 and October 26-27
The first field experience will be instruction intensive. Skills covered will include: Navigation, Water Treatment, LNT, Pacing, How-To-Teach a Skill, Bear Safety, Trip Planning, Menu Planning, Learning Styles, etc. During the second and third field trips all students will be assessed on their use the equipment, how they dealt with various scenarios and other events that happen. Students will receive a rubric prior to the trip outlining what standards have to be met in order to receive full credit. The rubric also includes an "action plan" which is designed to provide the student with suggestions on how to improve. For the second and third field sessions the students will be expected to lead a pre-trip meeting on the Thursday evening before the trip as well as doing the trip preparations on the Friday before the trip.

Final and 1 Quiz (100+50=150 total)
Quiz 1 will be the concepts discussed in the first half of the class and the Final will be on the concepts discussed in the second half of the class.

Plagiarism and Citation
Honesty is a primary responsibility of you and every other UAF student. The following are common guidelines regarding academic integrity:

1. Students will not collaborate on any quizzes, in-class exams, or take-home exams that contribute to their grade in a course, unless the course instructor grants permission. Only those materials permitted by the instructor may be used to assist in quizzes and examinations.
2. Students will not represent the work of others as their own. A student will attribute the source of information not original with himself or herself (direct quotes or paraphrases) in compositions, theses, and other reports.
3. No work submitted for one course may be submitted for credit in another course without the explicit approval of both instructors.

Feedback, Debriefing, and Assessment measures
Students will receive many forms of feedback, constructive criticism and assessment. There will be one-on-one meetings with the instructor throughout the semester. The rubrics are designed to show your strengths and weaknesses. Student will never receive a grade without an explanation on how to improve. Assessment is a two-way street, please feel free to provide me constructive criticism.

Students with disabilities
The Office of Disability Services implements the Americans with Disabilities Act (ADA), and insures that UAF students have equal access to the campus and course materials. I will work with the Office of Disabilities Services (203 WHIT, 474-7043) to provide reasonable accommodation to students with disabilities. Please inform me of any disabilities during the first two weeks of class.
