

Agenda for October 25, 2010 GAAC Meeting

1. Discussion/ approval of agenda.

2. Review of GAAC proposals.

A Word file is attached containing all the proposals GAAC needs to consider. The proposals have been organized by type (trial courses, new courses, course changes, course drops, and program changes). The GAAC member in charge of each item is identified in the third column. Please read your item, identify any problems/issues that exist, call/email the department contact person to discuss the issues, and be ready to lead discussion of the item at our meeting. We will discuss the items in the order presented in the Word file. The blue colored items have already been resolved by GAAC (and, thus do not need any further discussion by GAAC). The pink items (the voluminous EDSE proposals) will be delayed until a future meeting. The white items will be considered at this meeting. Obviously we only have about five minutes for each item. The intent is to resolve as many of the clean items as possible, identify items that will need a more detailed analysis, and invite the related contact to our next meeting if the item has not been resolved by our lead person via phone/email.

3. Discussion topics.

None urgent issues have been identified at this time. This meeting will be dedicated to dealing with proposals unless someone identifies an urgent issue that needs to be dealt with.

7. Other items?
