10. <u>COMPLETE</u> CATALOG DESCRIPTION including dept., number, title, credits, credit distribution, cross-listings and/or stacking (50 words or less if possible):

Example of a complete description:

FISH F487 W, O Fisheries Management

3 Credits Offered Spring

Theory and practice of fisheries management, with an emphasis on strategies utilized for the management of freshwater and marine fisheries. *Prerequisites: COMM F131X or COMM F141X; ENGL F111X; ENGL F211X or ENGL F213X; ENGL F414; FISH F425; or permission of instructor.* Cross-listed with NRM F487. (3+0)

MSL F194, Astrobiology, Offered Spring

Study of life in the universe from a transdisciplinary perspective, bringing together insights from physics, astronomy, geology, chemistry, and biology. Topics include the evolution of the universe, planets, oceans and life. Past and present oceans found in the Solar System provide case studies from which to examine the potential for life on and off the Earth. Societal questions related to the origins of life, global climate change, and the possibility of extraterrestrial life will be discussed. Prerequisites: none. (3+0)

11. COURSE CLASSIFICATIONS: Undergraduate courses only. Consult with CLA Curriculum Council to apply S or H classification appropriately; otherwise leave fields blank.

18. ESTIMATED IMPACT

| WHAT IMPACT, IF ANY, WILL | THIS HAVE ON BUDGET, F. | FACILITIES/SPACE, | FACULTY, ETC. |
|---------------------------|-------------------------|-------------------|---------------|
|---------------------------|-------------------------|-------------------|---------------|

New course development for faculty member. Course will fulfill part of instructional workload for faculty member. Room for new course serving up to 30 students will be needed. Room with teleconferencing ability will be needed.

19. LIBRARY COLLECTIONS

Have you contacted the library collection development officer (kljensen@alaska.edu, 474-6695) with regard to the adequacy of library/media collections, equipment, and services available for the proposed course? If so, give date of contact and resolution. If not, explain why not.

| No | | Yes | X | | Contacted Karen Jensen 8/29/13. Resources are available online and at UAF libraries |
|----|--|-----|---|--|----------------------------------------------------------------------------------------|
|----|--|-----|---|--|----------------------------------------------------------------------------------------|

20. IMPACTS ON PROGRAMS/DEPTS

What programs/departments will be affected by this proposed action? Include information on the Programs/Departments contacted (e.g., email, memo)

Course will be offered to all UAF students

21. POSITIVE AND NEGATIVE IMPACTS

Please specify positive and negative impacts on other courses, programs and departments resulting from the proposed action.

A positive impact will be the offering of a new, exciting course for undergraduates available through MSL, which makes use of knowledge of the oceans in a different way from any existing course, and offers a much broader (universal) perspective on the oceans.

JUSTIFICATION FOR ACTION REQUESTED

The purpose of the department and campus-wide curriculum committees is to scrutinize course change and new course applications to make sure that the quality of UAF education is not lowered as a result of the proposed change. Please address this in your response. This section needs to be self-explanatory. Use as much space as needed to fully justify the proposed course.

Astrobiology is a nascent field that integrates scientific and societal issues by asking Big Questions: How did life arise? Are we alone in the Universe? What is the future destiny of life on Earth? From experience in the Astrobiology Graduate Program at the University of Washington, and from speaking with instructors from other Introduction to Astrobiology courses around the world, I can say that a course like this nearly always fills to capacity and is a great way to introduce young students, who might not otherwise have interest in science, to the wonders of the natural world. The reason I am offering it as a Trial course rather than a New Course is to judge the interest and to ensure the correct level at which to offer it.

ATTACH COMPLETE SYLLABUS (as part of this application). This list is online at:

http://www.uaf.edu/uafgov/faculty-senate/curriculum/course-degree-procedures-/uaf-syllabus-requirements/

The Faculty Senate curriculum committees will review the syllabus to ensure that each of the items listed below are included. If items are missing or unclear, the proposed course (or changes to it) may be <u>denied</u>.

SYLLABUS CHECKLIST FOR ALL UAF COURSES

During the first week of class, instructors will distribute a course syllabus. Although modifications may be made throughout the semester, this document will contain the following information (as applicable to the discipline):

1. Course information:

Title, Inumber, Icredits, Iprerequisites, I location, I meeting time

(make sure that contact hours are in line with credits).

2. Instructor (and if applicable, Teaching Assistant) information:

□ Name, □ office location, □ office hours, □ telephone, □ email address.

3. Course readings/materials:

□ Course textbook title, □ author, □ edition/publisher.

- \Box Supplementary readings (indicate whether \Box required or \Box recommended) and
- **a**ny supplies required.

4. Course description:

□ Content of the course and how it fits into the broader curriculum;

Expected proficiencies required to undertake the course, if applicable.

□ Inclusion of catalog description is *strongly* recommended, and

 \Box Description in syllabus must be consistent with catalog course description.

5. \Box Course Goals (general), and (see #6)

6. Student Learning Outcomes (more specific)

7. Instructional methods:

Describe the teaching techniques (eg: lecture, case study, small group discussion, private instruction, studio instruction, values clarification, games, journal writing, use of Blackboard, audio/video conferencing, etc.).

8. Course calendar:

 \Box A schedule of class topics and assignments must be included. <u>Be specific</u> so that it is clear that the instructor has thought this through and will not be making it up on the fly (e.g. it is not adequate to say "lab". Instead, give each lab a title that describes its content). You may call the outline Tentative or Work in Progress to allow for modifications during the semester.

9. Course policies:

□ Specify course rules, including your policies on attendance, tardiness, class participation, make-up exams, and plagiarism/academic integrity.

10. Evaluation:

□ Specify how students will be evaluated, □ what factors will be included, □ their relative value, and □ how they will be

tabulated into grades (on a curve, absolute scores, etc.) \Box Publicize UAF regulations with regard to the grades of "C" and below <u>as applicable</u> to this course. (Not required in the syllabus, but is a convenient way to publicize this.) Link to PDF summary of grading policy for "C":

http://www.uaf.edu/files/uafgov/Info-to-Publicize-C_Grading-Policy-UPDATED-May-2013.pdf

11. Support Services:

Describe the student support services such as tutoring (local and/or regional) appropriate for the course.

12. Disabilities Services: Note that the phone# and location have been **updated**. <u>http://www.uaf.edu/disability/</u> The Office of Disability Services implements the Americans with Disabilities Act (ADA), and ensures that UAF students have equal access to the campus and course materials.

State that you will work with the Office of Disabilities Services (208 WHITAKER BLDG, 474-5655) to provide reasonable accommodation to students with disabilities.

5/21/2013

MSL 194 Astrobiology:

Planets, Oceans, and Life

Spring 2015

Instructor

Dr. Eric Collins 207B O'Neill (907) 474-6482 recollins@alaska.edu

office hours: Monday/Thursday 3:15 - 4:15 & by appointment

Astrobiology is the study of the origins, evolution, and future of life on Earth and elsewhere in the Universe. From humble beginnings as self-replicating chemical systems in primordial oceans to advanced civilizations capable of interplanetary flight, life has survived and thrived on Earth for billions of years. *But are we alone?* The goal of this course is to discover what scientists have learned about life in the universe while working to answer that question.

Textbook

Life in the Universe (3rd Edition) – J. Bennett and S. Shostak (2011) Addison-Wesley

Suggested supplementary readings:

The Astrobiology Primer: An Outline of General Knowledge – L.J. Mix and 21 others (2006) URL http://arxiv.org/abs/astro-ph/0610926

Astrobiology: A Multidisciplinary Approach – J. Lunine (2005) Addison-Wesley

Course outline:

- MWF 1:00-2:00 (3 hours per week), Room 201 O'Neill
- First Day of Classes: Friday, 16 January, 2015
- Mid-term Examination 1: Friday, 13 February, 2015
- Mid-term Examination 2: Friday, 10 April, 2015
- Last Day of Classes: Monday, 4 May, 2015
- Final Examination: XXX, XXX--XXXpm, Room 201 O'Neill

Course description:

MSL 194, Astrobiology, 3+0 credits Prerequisites: ENGL111X;

Study of life in the universe from a transdisciplinary perspective, bringing together insights from physics, astronomy, geology, chemistry, and biology. Topics include the evolution of the universe, planets, oceans and life. Past and present oceans found in the Solar System provide case studies from which to examine the potential for life on and off the Earth. Societal questions related to the origins of life, global climate change, and the possibility of extraterrestrial life will be discussed.

Learning Outcomes:

- Understand and explain the basic physical and chemical structure of the universe
- Evidence knowledge of major planetary formation and evolutionary processes
- Understand and discuss the relevance of water for the origins and evolution of life
- Describe the oceans of the Solar System, and predict their evolution over geologic time
- Explain the planetary geologic processes that influence global climate change
- Engage with peers' views on the origins and future of life on Earth

Instructional Methods: Lectures and small group discussions. Distance delivery available. All class presentations will be posted as Powerpoint slides on Blackboard. Instructor will use the Blackboard system to communicate with students.

| Tentative Start Date | Торіс | Reading (in textbook) |

| April 29 | Drake Equation & Fermi Paradox | Chapters 12+13 |
| May 4 | Contact & the Future of Astrobiology | Chapters 12+13 |
| May [5—8] | Comprehensive Final Exam (30%) | |

Schedule for Astrobiology Spring 2015

Evaluations:

Will be based on 2 mid-term exams, 2 essays, and a cumulative final exam. Grading is absolute.

- 20% (200 points) Mid-term examination 1: short answer and multiple choice
- 15% (150 points) Essay 1: see topics and format below
- 20% (200 points) Mid-term examination 2: short answer and multiple choice
- 15% (150 points) Essay 2: see topics and format below
- 30% (300 points) Comprehensive Final exam: short answer and multiple choice

Essay topics:

How will human impacts on Earth's oceans affect the future evolution of life on Earth and in our Solar System?

If human civilization ended tomorrow, what evidence of our existence would be left for extraterrestrial archaeologists to discover after one thousand, one million, and one billion years?

For each topic, provide an essay (up to 2000 words) plus a complete bibliography of all used resources, which can include secondary literature but should also include **primary** literature. The essays can be completed in either order and should be submitted to <u>recollins@alaska.edu</u> by midnight on the date that they are due. Late submissions will not be accepted. Preferred format: 12 pt font, single line spacing, 1" margins.

Course Policies: Students are expected to attend class and read the relevant chapter prior to the first lecture on that topic. This greatly facilitates participation during lectures, which is expected. *You are smarter than your phone. The use of cell phones, texting or other electronic communication (e.g. email, twitter, facebook etc.) during class is considered inappropriate.* Students should be familiar with the UAF Honor Code (you find it in the catalog). Neither cheating, plagiarism nor fabrication will be tolerated. Any student found cheating during the exams or to have plagiarized or fabricated statements (including passages from web pages) will receive an automatic 'F' for the **class**.

The following **non-curved** grading system will be used for the entire course:

| $\begin{array}{l} A+>\!95\% \\ A >\!90-95\% \end{array}$ | $\begin{array}{l} C > 63 - 67\% \\ C - > 60 - 63\% \end{array}$ |
|----------------------------------------------------------|-----------------------------------------------------------------|
| A->85-90% | |
| B + > 80 - 85% | Grades below $C-$ will not count toward the major or |
| B > 75 - 80% | minor degree requirements |
| B - > 70 - 75% | D = 50 - 60% |
| C+>67-70% | F <50 |

Support Services: At UAF, the Office of Disability Services (203 WHIT; 474-5655; TTY 474-1827; fydso@uaf.edu) ensures that students with physical or learning disabilities have equal access to the campus and course materials. If you have specialized needs, please contact this office or the instructor to make arrangements. The UAF Writing Center (801 Gruening Bldg) is available for helping students in brainstorming and generating topics, organizing ideas, developing research strategies, the use of citations, and editing for clarity and correctness. Contact them at http://www.uaf.edu/english/writing-center

Important contact information for long distance delivery students: The phone number for Lecture room 201 O'Neill in Fairbanks is 907 474-5377.
