See <http://www.uaf.edu/uafgov/faculty-senate/curriculum/course-degree-procedures/> for a complete description of the rules governing curriculum & course changes.

PROGRAM IDENTIFICATION: [Note: Program Name changes are MAJOR changes.]

DEGREE PROGRAM	Biological Sciences	
Degree Level: (i.e., Certificate, A.A., A.A.S., B.A., B.S., M.A., M.S., Ph.D.)	BS and BA	

2. REASON FOR CHANGE: Indicate what is changing with an "X" or checkmark:

TO CORRECT THE TEXT	<input checked="" type="checkbox"/>	Example: Correct Catalog production errors such as typos to course numbers or problems with layout.
TO UPDATE THE TEXT	<input checked="" type="checkbox"/>	Example: Add a new elective course that was approved the prior year but missed the March 1 catalog deadline. Program description updates must not affect degree requirements – otherwise use a Format 5 program change form.

Other reason (specify):	
-------------------------	--

A. CHANGES: (Brief statement of scope, or a list, of requested changes)

Changes:

1. Change the capstone project requirement, as decided by faculty in May 2014. The old rule was that a student could fulfill the capstone requirement by passing a designated capstone class with C or better. The new rule is that the student must achieve a passing grade on the capstone project itself in order to receive credit for the capstone project. This means that a student may pass the class and fail to meet the capstone project requirement, or vice versa. To track students pursuing a capstone and report grades to the registrar, a new zero-credit course, BIOL 4XX Capstone Project, is incorporated in the requirements.
2. Change the minimum grade to C- for the BA and BS programs.
3. Add a course to the list of designated capstone courses.
4. Correct the credit requirement for the capstone (change 3-4 to 0-4)
5. Allow students to complete the physics requirement of the BS degree by taking PHYS 211X and 212X, as well as PHYS 103X and 104X.
6. Correct a mistake in the BS Cell and Molecular Biology Concentration requirements.
7. Update the electives course list.

school are encouraged to take a biology course for non-majors such as Biology and Society (BIOL F103X) or Natural History of Alaska (BIOL F104X) and General Chemistry I and II (CHEM F105X and CHEM F106X) during their first year, and to begin the BIOL F115X and F116X series in their sophomore year. Students unprepared for General Chemistry I (CHEM F105X) should take Basic General Chemistry (CHEM F103X) during their first year, and begin both the General Chemistry (CHEM F105X and F106X) and Fundamentals of Biology Series (BIOL F115X and F116X) during their sophomore year. Students majoring in the biological sciences must complete a capstone project during their junior or senior year. The goal of the capstone experience is to integrate skills and information students have learned in previous courses by conducting a mentored research project and communicating the results. To fulfill the capstone requirement, a student may take either a designated capstone course or complete a mentored research project with a faculty member and petition the Biology and Wildlife chair to have this research experience count toward the capstone requirement. Biology course credit for mentored research may be obtained by completing BIOL F490, F397, or F497. More information about the capstone requirement is posted on the Biology and Wildlife website (www.bw.uaf.edu). Students are strongly encouraged to speak to a biology advisor well before their senior year about how they plan to satisfy the capstone requirement.

Major -- BA Degree

1. Complete the general university requirements. (As part of the core curriculum requirements, complete: CHEM F105X* and F106X*.)
2. Complete the BA degree requirements. As part of the BA degree requirements, complete STAT F200X*. As part of the humanities and social sciences requirement, take at least 9 credits of upper-division course work. As part of the minor, take at least 3 credits of upper-division course work.
3. Complete the following program (major) requirements: *
 - a. Complete the following:
 - BIOL F115X--Fundamentals of Biology I--4 credits
 - BIOL F116X--Fundamentals of Biology II--4 credits
 - BIOL F260--Principles of Genetics--4 credits
 - BIOL F481--Principles of Evolution--4 credits
 - CHEM F321--Organic Chemistry --4 credits
 - PHYS F103X--College Physics--4 credits
 - b. Complete two of the following three biology breadth requirements:**
 - BIOL F310--Animal Physiology (4)
 - or BIOL F342--Microbiology (4)
 - or BIOL F434W--Structure and Function of Vascular Plants (4)
 - or BIOL F213X and F214X--Human Anatomy and Physiology I and II (8)--4 - 8 credits
 - BIOL F360--Cell and Molecular Biology--3 credits
 - BIOL F371--Principles of Ecology--4 credits
 - c. Complete three elective courses from course lists A, B, C or D below, at least one of which is designated a W course.*** If possible, satisfy all UAF core requirements for W and O courses and the biology capstone requirement with these elective courses.
 - d. Complete a biology capstone project (no credit requirement):
 - The capstone requirement can be met through a petition following the completion of a mentored research project with a faculty member (e.g., by taking BIOL F490, or BIOL F497, or without course credits), or by completing at least one of the following courses:
 - BIOL F403W--Metabolism and Biochemistry (4)
 - or BIOL F434W--Plant Structure and Function of Vascular Plants (4)
 - or BIOL F441W,O/2--Animal Behavior (3)
 - or BIOL F472W--Community Ecology (4)
 - or BIOL F473W--Limnology (3)--3 - 4 credits
4. Minimum credits required--120 credits

Major -- BS Degree without concentration

1. Complete the general university requirements. (As part of the core curriculum requirements, complete: MATH F200X* or MATH F272X*; and CHEM F105X* and F106X*.)
2. Complete the BS degree requirements. (As part of the BS degree requirements, complete STAT F200X* or STAT F300* and PHYS F103X* and PHYS F104X*.)
3. Complete the following program (major) requirements: *
 - BIOL F115X--Fundamentals of Biology I--4 credits
 - BIOL F116X--Fundamentals of Biology II--4 credits
 - BIOL F260--Principles of Genetics--4 credits
 - BIOL F360--Cell and Molecular Biology--3 credits
 - BIOL F371--Principles of Ecology--4 credits
 - BIOL F310--Animal Physiology (4)
 - or BIOL F342--Microbiology (4)
 - or BIOL F213X and F214X--Human Anatomy and Physiology I and II (8)
 - or BIOL F434W--Structure and Function of Vascular Plants (4)--4 - 8 credits
 - BIOL F481--Principles of Evolution--4 credits
 - CHEM F321--Organic Chemistry I (4)
 - and either CHEM F322--Organic Chemistry II(3)
 - or CHEM F451--General Biochemistry -- Metabolism (3)--3 - 4 credits
4. Complete the following electives (at least one must satisfy the W requirement):***
 - Organismal elective:
 - Complete one additional course from list D--3 - 4 credits
 - Biology electives:
 - Complete four additional courses at the 200 level or above, at least three of which must be from lists A, B, C or D 2 - 16
5. Complete a biology capstone project (no credit requirement):
 - The capstone requirement can be met through a petition following the completion of a mentored research project with a faculty member (e.g., by taking BIOL F490, or BIOL F497, or without course credits), or by completing at least one of the following courses:
 - BIOL F403W--Metabolism and Biochemistry (4)
 - or BIOL F434W--Structure and Function of Vascular Plants (4)
 - or BIOL F441W,O/2--Animal Behavior (3)
 - or BIOL F472W--Community Ecology (4)
 - or BIOL F473W--Limnology (3)
6. Minimum credits required--120 credits

Major -- BS Degree with concentration

1. Complete the general university requirements. (As part of the core curriculum requirements, complete: MATH F200X* or MATH F272X*; and CHEM F105X* and F106X*.)
2. Complete the BS degree requirements. (As part of the BS degree requirements, complete STAT F200X* or STAT F300* and PHYS F103X* and PHYS F104X*.)
3. Complete the following program (major) requirements: *
 - BIOL F115X--Fundamentals of Biology I--4 credits
 - BIOL F116X--Fundamentals of Biology II--4 credits
 - BIOL F260--Principles of Genetics--4 credits
 - BIOL F310--Animal Physiology (4)
 - or BIOL F434W--Structure and Function of Vascular Plants (4)

- or BIOL F342--Microbiology (4)
 or BIOL F213X and F214X--Human Anatomy and Physiology I and II (8)--4 - 8 credits
 BIOL F481--Principles of Evolution--4 credits
 CHEM F321--Organic Chemistry I (4)
 and either CHEM F322--Organic Chemistry II (3)
 or CHEM F451--General Biochemistry -- Metabolism (3)--3 - 4 credits
4. Complete one of the following concentrations:***.
 (When choosing courses to fulfill concentration requirements, students should consider the university requirement for two W courses and one O course, and the departmental requirement for a capstone project.)
- a. Cell and Molecular Biology
- i. As part of the program requirements, complete CHEM F321.
 - ii. Complete the following (at least one of which must satisfy the W requirement):
 BIOL F360--Cell and Molecular Biology--3 credits
 CHEM F450--General Biochemistry -- Macromolecules--3 credits
 CHEM F451--General Biochemistry -- Metabolism--3 credits
 Cell and molecular and physiology electives:
 Take three additional courses from lists A or B, at least one of which must be from list A.--9 - 12 credits
 Biology breadth elective:
 Take one additional course from lists C or D--3 - 4 credits
- b. Physiology
 Complete the following (at least one of which must satisfy the W requirement)
 BIOL F360--Cell and Molecular Biology--3 credits
 Physiology or cell and molecular biology electives:
 Take two courses from list A and two from list B--12 - 16 credits
 Biology breadth elective:
 Take one additional course from lists C or D--3 - 4 credits
 Biology elective:
 Take one additional course from lists A, B, C or D--3 - 4 credits
- c. Ecology and Evolutionary Biology
 Complete the following (at least one of which must satisfy the W requirement):
 BIOL F371--Principles of Ecology--4 credits
 Ecology and evolutionary biology electives:
 Take two additional courses from list C--6 - 8 credits
 Organismal elective:
 Take one additional course from list D--3 - 4 credits
 Biology breadth elective:
 Take one additional course from lists A or B--3 - 4 credits
 Biology elective:
 Take one additional course from lists A, B, C or D--3 - 4 credits
 STAT F401--Regression and Analysis of Variance (4)
 or STAT F402--Scientific Sampling (3)--3 - 4 credits
5. Complete a biology capstone project (no credit requirement):
 The capstone requirement can be met through a petition following the completion of a mentored research project with a faculty member (e.g., by taking BIOL F490, or BIOL F497, with or without course credits), or by completing at least one of the following courses:
 BIOL F403W--Metabolism and Biochemistry (4)
 or BIOL F434W--Structure and Function of Vascular Plants (4)
 or BIOL F441W,O/2--Animal Behavior (3)
 or BIOL F472W--Community Ecology (4)
 or BIOL F473W--Limnology (3)--3 - 4 credits
6. Minimum credits required--120 credits

Biology elective course lists:****

- **List A -- Cell and Molecular Biology**
 BIOL F342--Microbiology--3 credits
 BIOL F360--Cell and Molecular Biology--3 credits
 BIOL F403W--Metabolism and Biochemistry--4 credits
 BIOL F4170--Neurobiology--3 credits
BIOL 435--Biology of Cancer--3 credits
BIOL 460--Principles of Virology--3 credits
 BIOL F462O--Concepts of Infectious Disease--3 credits
 BIOL F465--Immunology--3 credits
 CHEM F322--Organic Chemistry II--3 credits
 CHEM F450--General Biochemistry -- Macromolecules--3 credits
 CHEM F451--General Biochemistry -- Metabolism--3 credits
 CHEM F470--Cellular and Molecular Neuroscience--3 credits
 CHEM F474--Neurochemistry--3 credits
- **List B -- Physiology**
 BIOL F310--Animal Physiology--4 credits
 BIOL F317--Comparative Anatomy--4 credits
 BIOL F335--Epidemiology--3 credits
 BIOL F342--Microbiology--4 credits
 BIOL F4170--Neurobiology--3 credits
 BIOL F422--Physiology and Ecology of Overwintering--3 credits
 BIOL F434W--Structure and Function in Vascular Plants--4 credits
 BIOL F441W,O/2--Animal Behavior--3 credits
 BIOL F455W,O--Environmental Toxicology--3 credits
 BIOL F457W,O--Environmental Microbiology--3 credits
 BIOL F458--Vertebrate Endocrinology--3 credits
 BIOL F459O/2--Wildlife Nutrition--4 credits
 BIOL F462O--Concepts of Infectious Disease--3 credits
 BIOL F465--Immunology--3 credits
- **List C -- Ecology and Evolutionary Biology**
 BIOL F371--Principles of Ecology--4 credits
 BIOL F418--Biogeography--3 credits
 BIOL F433--Conservation Genetics--3 credits

BIOL F441W,O/2--Animal Behavior--3 credits
 BIOL F457W--Environmental Microbiology--3 credits
 BIOL F462O--Concepts of Infectious Disease--3 credits
 BIOL F469O--Landscape Ecology and Wildlife Habitat--3 credits
 BIOL F471--Population Ecology--3 credits
 BIOL F472W--Community Ecology--3 credits
 BIOL F473W--Limnology--3 credits
 BIOL F474--Plant Ecology--4 credits
 BIOL F476O--Ecosystem Ecology--3 credits
 BIOL F483--Stream Ecology--3 credits
 BIOL F485--Global Change Ecology--3 credits
 BIOL F486--Vertebrate Paleontology--3 credits
 BIOL F487--Conceptual Issues in Evolutionary Biology--3 credits
 BIOL F488--Arctic Vegetation Ecology: Geobotany--3 credits
 BIOL F489--Vegetation Description and Analysis--3 credits
 WLF F301--Design of Wildlife Studies--3 credits
 WLF F410--Wildlife Populations and their Management--3 credits

Minor

1. Complete the following program (minor) requirements:*
 BIOL F115X--Fundamentals of Biology I--4 credits
 BIOL F116X--Fundamentals of Biology II--4 credits
 BIOL F260--Principles of Genetics--4 credits
2. Complete one of the following course options:****
 BIOL F213X and F214X--Human Anatomy and Physiology I and II (8)
 or BIOL F310--Animal Physiology (4)
 or BIOL F342--Microbiology (4)
 or BIOL F360--Cell and Molecular Biology (3)
 or BIOL F371--Principles of Ecology (4)
 or BIOL F434W--Structure and Function of Vascular Plants (4)
 or BIOL F481--Principles of Evolution (4)--3 - 8 credits
3. Complete one additional course in biology at the 200-level or above--3 credits
4. Minimum credits required--18 credits

* Students must earn a C or better in each course.

** Because biology breadth courses for the BA degree serve as prerequisites for many upper-division biology electives, course choices should be made with consideration of the elective biology courses the student plans to complete.

*** Independent study (BIOL F397 or F497) or research experience (URSA F388 and F488, and BIOL F490) courses may be substituted by petition for a maximum of two required elective courses in biology (3 - 4 credits of independent study or research per substituted course). The subject area of the independent study or research will determine which biological subject areas the credits satisfy.

**** Courses that satisfy upper-division elective credit may require prerequisites in addition to the required biology course.

Note: A foreign language is encouraged by the department in meeting requirements of the core curriculum.

**C. CORRECTED DESCRIPTION AS IT WILL APPEAR IN THE CATALOG WITH THESE CHANGES:
 (Underline new wording strike through old wording and use complete catalog format)**

Note: References to courses lacking final course numbers are highlighted

Minimum Requirements for Degrees: 120 credits

Biological sciences is an appropriate major for students interested in the science of life. Programs in these fields provide a broad education and a foundation in the basic principles of biology. Graduates are employed in environmental science, health services, biology education, and as field and laboratory technicians. Graduates may also pursue advanced MS, pharmacology, nursing, MD or PhD degrees. Biology faculty advisors can help students choose courses that will best fit their goals.

Biological sciences majors may pursue either a BA or BS degree. Because biology is an interdisciplinary science, both programs include course work in the physical sciences and mathematics. The BA requires fewer credits in biology science and more credits in the social sciences and humanities than the BS degree, which focuses more intensively on biological science. The BS degree without a concentration provides the most comprehensive education in biology. The BS degree with a concentration permits some degree of specialization in one of three sub-disciplines: cell and molecular biology, physiology, or ecology and evolutionary biology.

Incoming students who do not meet the prerequisites for Fundamentals of Biology I (BIOL F115X) and those who did not complete a biology course in high school are encouraged to take a biology course for non-majors such as Biology and Society (BIOL F103X) or Natural History of Alaska (BIOL F104X) and General Chemistry I and II (CHEM F105X and CHEM F106X) during their first year, and to begin the BIOL F115X and F116X series in their sophomore year. Students unprepared for General Chemistry I (CHEM F105X) should be encouraged to take Basic General Chemistry (CHEM F103X) beforehand during their first year, and begin both the General Chemistry (CHEM F105X and F106X) and Fundamentals of Biology Series (BIOL F115X and F116X) during their sophomore year.

Students majoring in the biological sciences must complete a capstone project during their junior or senior year. The goal of the capstone experience is to integrate skills and information students have learned in previous courses by conducting a mentored research project and communicating the results. Students will signal their intent to complete the capstone requirement by registering for BIOL 4XX, Capstone Project. The capstone research project itself may be completed within

one of the designated courses listed below, or by working individually with a faculty mentor. If the capstone project is conducted within a designated course, a passing grade on the project itself is required to satisfy the capstone requirement, regardless of the course grade. To fulfill the capstone requirement, a student may take either a designated capstone course or complete a mentored research project with a faculty member and petition the Biology and Wildlife chair to have this research experience count toward the capstone requirement. Biology course credit for individual mentored research may be obtained by completing is available as BIOL F490, F397, or F497. More information about the capstone requirement is posted on the Biology and Wildlife website (www.bw.uaf.edu). Students are strongly encouraged to speak to a biology advisor well before their senior year about how they plan to satisfy the capstone requirement.

Major -- BA Degree

1. Complete the general university requirements. (As part of the core curriculum requirements, complete: CHEM F105X* and F106X*.)
2. Complete the BA degree requirements. As part of the BA degree requirements, complete STAT F200X*. As part of the humanities and social sciences requirement, take at least 9 credits of upper-division course work. As part of the minor, take at least 3 credits of upper-division course work.
3. Complete the following program (major) requirements:*
 - a. Complete the following:
 - BIOL F115X--Fundamentals of Biology I--4 credits
 - BIOL F116X--Fundamentals of Biology II--4 credits
 - BIOL F260--Principles of Genetics--4 credits
 - BIOL F481--Principles of Evolution--4 credits
 - CHEM F321--Organic Chemistry --4 credits
 - PHYS F103X--College Physics--4 credits
 - b. Complete two of the following three biology breadth requirements:**
 - BIOL F310--Animal Physiology (4)
or BIOL F342--Microbiology (4)
or BIOL F434W--Structure and Function of Vascular Plants (4)
or BIOL F213X and F214X--Human Anatomy and Physiology I and II (8)--4 - 8 credits
 - BIOL F360--Cell and Molecular Biology--3 credits
 - BIOL F371--Principles of Ecology--4 credits
 - c. Complete three elective courses from course lists A, B, C or D below, at least one of which is designated a W course.*** If possible, satisfy all UAF core requirements for W and O courses and the biology capstone requirement with these elective courses. — 9 – 12 credits
 - d. Satisfy the capstone project requirement by passing BIOL 4XX "Capstone Project" (0 credits), which requires the satisfactory completion of a capstone research project. The project can be done either working individually with a faculty mentor (e.g. by taking BIOL F490, or BIOL F497, or without course credits), or within one of the following courses:
 - BIOL F403W--Metabolism and Biochemistry (4)
or BIOL F434W--Plant Structure and Function of Vascular Plants (4)
or BIOL F441W,O/2--Animal Behavior (3)
or BIOL F459O/2—Wildlife Nutrition (4)
or BIOL F472W--Community Ecology (4)
or BIOL F473W--Limnology (3)--30 - 4 credits
4. Minimum credits required--120 credits

Major -- BS Degree without concentration

1. Complete the general university requirements. (As part of the core curriculum requirements, complete: MATH F200X* or MATH F272X*; and CHEM F105X* and F106X*.)
2. Complete the BS degree requirements. (As part of the BS degree requirements, complete STAT F200X* or STAT F300* and either PHYS F103X* and PHYS F104X* or PHYS F211X* and PHYS F212X*.)
3. Complete the following program (major) requirements:*
 - BIOL F115X--Fundamentals of Biology I--4 credits
 - BIOL F116X--Fundamentals of Biology II--4 credits
 - BIOL F260--Principles of Genetics--4 credits
 - BIOL F360--Cell and Molecular Biology--3 credits
 - BIOL F371--Principles of Ecology--4 credits
 - BIOL F310--Animal Physiology (4)
or BIOL F342--Microbiology (4)
or BIOL F213X and F214X--Human Anatomy and Physiology I and II (8)
or BIOL F434W--Structure and Function of Vascular Plants (4)--4 - 8 credits
 - BIOL F481--Principles of Evolution--4 credits
 - CHEM F321--Organic Chemistry I (4)
and either CHEM F322--Organic Chemistry II(3)
or CHEM F451--General Biochemistry -- Metabolism (3)--3 - 4 credits
4. Complete the following electives (at least one must satisfy the W requirement):***
 - Organismal elective:
Complete one additional course from list D--3 - 4 credits
 - Biology electives:
Complete four additional courses at the 200 level or above, at least three of which must be from lists A, B, C or D -- 12

5. Satisfy the capstone project requirement by passing BIOL 4XX "Capstone Project" (0 credits), which requires the satisfactory completion of a capstone research project. The project can be done either working individually with a faculty mentor (e.g. by taking BIOL F490, or BIOL F497, or without course credits), or within one of the following courses:
BIOL F403W--Metabolism and Biochemistry (4)
or BIOL F434W--Plant Structure and Function of Vascular Plants (4)
or BIOL F441W,O/2--Animal Behavior (3)
or BIOL F459O/2--Wildlife Nutrition (4)
or BIOL F472W--Community Ecology (4)
or BIOL F473W--Limnology (3)--30 - 4 credits
6. Minimum credits required--120 credits

Major -- BS Degree with concentration

1. Complete the general university requirements. (As part of the core curriculum requirements, complete: MATH F200X* or MATH F272X*; and CHEM F105X* and F106X*.)
2. Complete the BS degree requirements. (As part of the BS degree requirements, complete STAT F200X* or STAT F300* and PHYS F103X* and PHYS F104X* or PHYS F211X* and PHYS F212X*.)
3. Complete the following program (major) requirements: *
BIOL F115X--Fundamentals of Biology I--4 credits
BIOL F116X--Fundamentals of Biology II--4 credits
BIOL F260--Principles of Genetics--4 credits
BIOL F310--Animal Physiology (4)
or BIOL F434W--Structure and Function of Vascular Plants (4)
or BIOL F342--Microbiology (4)
or BIOL F213X and F214X--Human Anatomy and Physiology I and II (8)--4 - 8 credits
BIOL F481--Principles of Evolution--4 credits
CHEM F321--Organic Chemistry I (4)
and either CHEM F322--Organic Chemistry II (3)
or CHEM F451--General Biochemistry -- Metabolism (3)--3 - 4 credits
4. Complete one of the following concentrations:***.
(When choosing courses to fulfill concentration requirements, students should consider the university requirement for two W courses and one O course, and the departmental requirement for a capstone project.)
 - a. **Cell and Molecular Biology**
 - i As part of the program requirements, complete CHEM F321+2.
 - ii Complete the following (at least one of which must satisfy the W requirement):
BIOL F360--Cell and Molecular Biology--3 credits
CHEM F450--General Biochemistry -- Macromolecules--3 credits
CHEM F451--General Biochemistry -- Metabolism--3 credits
Cell and molecular and physiology electives:
Take three additional courses from lists A or B, at least one of which must be from list A.--9 - 12 credits
Biology breadth elective:
Take one additional course from lists C or D--3 - 4 credits
 - b. **Physiology**
Complete the following (at least one of which must satisfy the W requirement):
BIOL F360--Cell and Molecular Biology--3 credits
Physiology or cell and molecular biology electives:
Take two courses from list A and two from list B--12 - 16 credits
Biology breadth elective:
Take one additional course from lists C or D--3 - 4 credits
Biology elective:
Take one additional course from lists A, B, C or D--3 - 4 credits
 - c. **Ecology and Evolutionary Biology**
Complete the following (at least one of which must satisfy the W requirement):
BIOL F371--Principles of Ecology--4 credits
Ecology and evolutionary biology electives:
Take two additional courses from list C--6 - 8 credits
Organismal elective:
Take one additional course from list D--3 - 4 credits
Biology breadth elective:
Take one additional course from lists A or B--3 - 4 credits
Biology elective:
Take one additional course from lists A, B, C or D--3 - 4 credits
STAT F401--Regression and Analysis of Variance (4)
or STAT F402--Scientific Sampling (3)--3 - 4 credits
5. Satisfy the capstone project requirement by passing BIOL 4XX "Capstone Project," (0 credits), which requires the satisfactory completion of a capstone research project. The project can be done either working individually with a faculty mentor (e.g. by taking BIOL F490, or BIOL F497, or without course credits), or within one of the following courses:

BIOL F403W--Metabolism and Biochemistry (4)
or BIOL F434W--Plant Structure and Function of Vascular Plants (4)
or BIOL F441W,O/2--Animal Behavior (3)
or BIOL F459O/2--Wildlife Nutrition (4)
or BIOL F472W--Community Ecology (4)
or BIOL F473W--Limnology (3)--30 - 4 credits

6. Minimum credits required--120 credits

Biology elective course lists:****

• **List A -- Cell and Molecular Biology**

BIOL F342--Microbiology--3 credits
BIOL F360--Cell and Molecular Biology--3 credits
BIOL F403W--Metabolism and Biochemistry--4 credits
BIOL F417O--Neurobiology--3 credits
BIOL F435--Biology of Cancer--3 credits
BIOL F460--Principles of Virology--3 credits
BIOL F462O--Concepts of Infectious Disease--3 credits
BIOL F465--Immunology--3 credits
BIOL F4XX--Advanced Cell and Molecular Biology Laboratory--3 credits
CHEM F322--Organic Chemistry II--3 credits
CHEM F450--General Biochemistry -- Macromolecules--3 credits
CHEM F451--General Biochemistry -- Metabolism--3 credits
CHEM F470--Cellular and Molecular Neuroscience--3 credits
CHEM F474--Neurochemistry--3 credits

• **List B -- Physiology**

BIOL F310--Animal Physiology--4 credits
~~BIOL F317--Comparative Anatomy--4 credits~~
BIOL F335--Epidemiology--3 credits
BIOL F342--Microbiology--4 credits
BIOL F417O--Neurobiology--3 credits
BIOL F422--Physiology and Ecology of Overwintering--3 credits
BIOL F434W--Structure and Function in Vascular Plants--4 credits
BIOL F441W,O/2--Animal Behavior--3 credits
BIOL F455W,O--Environmental Toxicology--3 credits
BIOL F457W,O--Environmental Microbiology--3 credits
BIOL F458--Vertebrate Endocrinology--3 credits
BIOL F459O/2--Wildlife Nutrition--4 credits
BIOL F462O--Concepts of Infectious Disease--3 credits
BIOL F465--Immunology--3 credits
BIOL F4XX--Exercise Physiology--3 credits

• **List C -- Ecology and Evolutionary Biology**

BIOL F371--Principles of Ecology--4 credits
BIOL F418--Biogeography--3 credits
BIOL F433--Conservation Genetics--3 credits
BIOL F441W,O/2--Animal Behavior--3 credits
BIOL F457W--Environmental Microbiology--3 credits
~~BIOL F462O--Concepts of Infectious Disease--3 credits~~
BIOL F469O--Landscape Ecology and Wildlife Habitat--3 credits
BIOL F471--Population Ecology--3 credits
BIOL F472W--Community Ecology--3 credits
BIOL F473W--Limnology--3 credits
BIOL F474--Plant Ecology--4 credits
BIOL F476O--Ecosystem Ecology--3 credits
BIOL F483--Stream Ecology--3 credits
BIOL F485--Global Change Ecology--3 credits
BIOL F486--Vertebrate Paleontology--3 credits
BIOL F487--Conceptual Issues in Evolutionary Biology--3 credits
BIOL F488--Arctic Vegetation Ecology: Geobotany--3 credits
BIOL F489--Vegetation Description and Analysis--3 credits
WLF F301--Design of Wildlife Studies--3 credits
WLF F410--Wildlife Populations and their Management--3 credits

Minor

1. Complete the following program (minor) requirements:
BIOL F115X--Fundamentals of Biology I--4 credits

BIOL F116X--Fundamentals of Biology II--4 credits

BIOL F260--Principles of Genetics--4 credits

2. Complete one of the following course options:****

BIOL F213X and F214X--Human Anatomy and Physiology I and II (8)

or BIOL F310--Animal Physiology (4)

or BIOL F342--Microbiology (4)

or BIOL F360--Cell and Molecular Biology (3)

or BIOL F371--Principles of Ecology (4)

or BIOL F434W--Structure and Function of Vascular Plants (4)

or BIOL F481--Principles of Evolution (4)--3 - 8 credits

3. Complete one additional course in biology at the 200-level or above--3 credits

4. Minimum credits required--18 credits

* Students must earn a C- or better in each course.

** Because biology breadth courses for the BA degree serve as prerequisites for many upper-division biology electives, course choices should be made with consideration of the elective biology courses the student plans to complete.

*** Independent study (BIOL F397 or F497) or research experience (BIOL 490, URSA F388, or URSA ~~and F488, and BIOL F490~~) courses may be substituted by petition for a maximum of two required elective courses in biology (3 - 4 credits of independent study or research per substituted course). The subject area of the independent study or research will determine which biological subject areas the credits satisfy.

**** Courses that satisfy upper-division elective credit may require prerequisites in addition to the required biology course.

Note: A foreign language is encouraged by the department in meeting requirements of the core curriculum.

D. ESTIMATED IMPACT

WHAT IMPACT, IF ANY, WILL THIS HAVE ON BUDGET, FACILITIES/SPACE, FACULTY, ETC.

Little impact is anticipated to budget, facilities, or faculty workloads.

E. IMPACTS ON PROGRAMS/DEPTS:

*What programs/departments will be affected by this proposed action?
Include information on the Programs/Departments contacted (e.g., email, memo)*

Students majoring in Biological Sciences will be impacted by these changes.

F. IF MAJOR CHANGE - ASSESSMENT OF THE PROGRAM:

Description of the student learning outcomes assessment process.)

Capstone projects in the Biological Sciences degree address the intended student learning outcomes of the Biological Sciences program, especially the “critical and creative thinking” outcome (<http://www.uaf.edu/provost/assessment-review/assessment/college-of-natural-science/>). All capstone projects are (and will continue to be) assessed using a common rubric (<http://www.bw.uaf.edu/undergraduates/capstone.php>). The new rules for satisfying the capstone requirement reflected in this program change will require the department chair to act as liaison between capstone course instructors and the Registrar in order to communicate a list of students who satisfactorily completed the capstone each semester.

JUSTIFICATION FOR ACTION REQUESTED

The purpose of the department and campus-wide curriculum committees is to scrutinize program/degree change applications to make sure that the quality of UAF education is not lowered as a result of the proposed change. Please address this in your response. This section needs to be self-explanatory. If you drop a course, is it because the material is covered elsewhere? Use as much space as needed to fully justify the proposed change and explain what has been done to ensure that the quality of the program is not compromised as a result.

Changes to the capstone: The majority of voting faculty of Biology and Wildlife Department favored decoupling the assessment of the capstone project from the assessment of the course in which it was completed, to ensure that the learning objectives of the capstone project are met for every graduating student. The new zero-credit Capstone Project class was introduced as a means to report the outcome of the capstone project to the registrar.

Changes to the minimum grade: When the Faculty Senate decided in March 2013 to accept a C- as the minimum passing grade, the Biology & Wildlife faculty voted to retain the C as the minimum grade in our undergraduate programs. This was motivated by the desire to uphold standards. We were the only department in CNSM, and one of few departments at UAF, to retain the minimum C. Over the past year and a half, we have learned that misalignments with the rest of the university (particularly the college) have placed our majors at a disadvantage. Although the majority of B&W faculty would still prefer C as the minimum grade, they acknowledge a greater need for alignment across departments. In a second vote in September 2014, the faculty agreed to accept C- as the minimum grade in our undergraduate degree programs.

APPROVALS:

Your approval indicates that NO DEGREE REQUIREMENTS are being changed by the minor changes to this program, and no program name is being changed. Only catalog updates and corrections are being accomplished by means of this form.

	Date	10/29/14
