### **PROGRAM IDENTIFICATION:**

DEGREE PROGRAM	Rural Development	
Degree Level: (i.e., Ce Ph.D.)	ertificate, A.A., A.A.S., B.A., B.S., M.A., M.S.,	BA

### A. CHANGE IN DEGREE REQUIREMENTS: (Brief statement of program/degree changes and objectives)

The program has refined its description and application process, expanded and focused its core requirements around skill building, updated the concentration areas to better reflect student interests and employment opportunities, and provided additional focus to the concentration areas by adding required concentration classes. The objective is to provide a modern, interdisciplinary rural development program that focuses on the most important areas of development for rural Alaska and other rural areas.

### Downloadable PDF

Minimum Requirements for Degree: 120 credits

Rural development degree programs are designed to educate a new generation of community leaders for rural Alaska. The B.A. degree can be earned either on the Fairbanks campus or through distance delivery. Special application requirements and deadlines apply for distance B.A. degree programs. Students applying for acceptance into the Rural Development program need to complete two department-specific requirements in addition to general university admission: an oral interview with faculty and a written questionnaire. Findings from this process will be used to support the department advising process and assist students in connecting with faculty and mentors. The questionnaire and instructions for the oral interview are found on the DANSRD website under "How to Apply."

Students in the rural development program gain a broad understanding of Alaska's relationship to the global economy and an appreciation for sustainable development strategies. Students also learn specific tools essential for community leadership, including business plan and grant proposal writing, community visioning and planning processes, computer business applications, project management, and evaluation techniques. Graduates typically take positions with tribal and municipal governments, fisheries, tourism and other private businesses, Native corporations, regional health corporations or nonprofits, and state/federal agencies.

Within the B.A. degree program, students will select and develop a concentration in one of five areas:

• The community health and wellness concentration is for students with a strong interest in health and wellness. Students focus on the various facets of a healthy rural community. Going beyond the basics of health care, they explore different aspects of wellness within a community and develop tools to attain community wellness goals. Students blend and apply both contemporary and traditional health and wellness tools. Graduates may find employment with tribal governments, health consortia, clinics and schools.

• The community research and indigenous knowledge concentration is for students with interests in applied research involving Alaska Native communities, cultures, languages, ceremonial performances and histories. Students learn principles of ethical research, explore issues of intellectual and cultural property rights, and acquire skills to do ethnographies, oral histories, community surveys and needs assessments, and archival research. Graduates may find employment with museums, ANCSA corporations, tribal governments, and state and federal agencies.

• The concentration in **indigenous organization management** is designed for students interested in development and operations of indigenous organizations in rural Alaska. Students develop an understanding of the history and constitutional basis for tribal governance, basics of federal Indian law, principles and practices of self-determination, and the mandates of the Alaska Native Claims Settlement Act. They develop skills in planning, budgeting and human resources management. Students can pursue a special interest, such as management of health programs, tribal governance programs or Alaska Native corporations, and tailor the concentration to these specifications through choice of related courses and electives. Graduates may find employment with tribal and municipal governments and organizations, ANCSA corporations, and state and federal agencies.

• The natural resource development concentration is designed for students with an interest in land and resources development, co-management and conservation. Students learn about traditional ecological knowledge, principles of natural resources management and policy, adaptive management, conservation and ecotourism, and skills for effective public/private/tribal collaboration in resource management. Management strategies for addressing climate change are explored. Graduates may find employment with ANCSA corporations, regional and tribal entities, or state and federal agencies.

• The concentration in **rural community business and economic development planning** is for students interested in creating sustainable economies in rural and indigenous communities, with a focus on small business development. Students learn to develop business and marketing plans, economic development planning, and basic principles of financial and human resources management for rural enterprises. Graduates find employment in ANCSA corporations, regional development organizations, economic development agencies and as local entrepreneurs.

For more information contact the department toll-free at 888-574-6528 or visit our website: <u>www.uaf.edu/danrd/</u>.

Major -- B.A. Degree

Concentrations: Community Health and Wellness; Community Research and Indigenous Knowledge; Indigenous Organization Management; Natural Resource Development; or Rural Community Business and Economic Development Planning.

Complete the <u>general university requirements</u>. Complete the <u>B.A. degree requirements</u>. Complete the following:\* RD F300W--Rural Development in a Global Perspective--3 credits RD F325--Community Development Strategies--3 credits RD F350O--Indigenous Knowledge and Community Research--3 credits RD F351--Strategic Planning for Rural Communities--3 credits RD F352--Rural Business Planning and Proposal Development--3 credits RD F400--Rural Development Internship--3 credits RD F450--Managing Rural Projects and Programs--3 credits RD F475W--Rural Development Senior Project--3 credits Complete the following:\* RD elective--3 credits RD, ANS, TM or ED electives--6 credits

B.A., M.A. DEGREES; MINOR

Downloadable PDF

Minimum Requirements for Degree: 120 credits

<u>Rural development is an interdisciplinary field that teaches the history, theory, and skills needed for human, social, and economic development in rural communities.</u> Rural development degree programs are designed to educate a new generation of community leaders for rural Alaska. The B.A. degree can be earned either on the Fairbanks campus or through distance delivery. Special application requirements and deadlines apply for

distance B.A. degree programs. Students applying for acceptance into the Rural Development program need to complete two <u>a</u> department-specific requirements written questionnaire in addition to general university admission requirements. : an oral interview with faculty and a written questionnaire. Findings from this process <u>questionnaire</u> will be used to support the department advising process and assist students in connecting with faculty and mentors. The questionnaire and instructions for the oral interview are <u>is</u> found on the DANSRD website under "How to Apply."

Students in the rural development program gain a broad understanding of Alaska's relationship to the global economy and an appreciation for sustainable development strategies. Students also learn specific tools essential for community leadership, including business plan and grant proposal writing, community visioning and planning processes, <u>community-based research techniques</u>, computer business applications, project management, and evaluation techniques. Graduates typically take positions with tribal and municipal governments, fisheries, tourism and other private businesses, Native corporations, regional health corporations or nonprofits, and state/federal agencies.

Within the B.A. degree program, students will select and develop a concentration in one of five areas:

- The community health and wellness concentration is for students with a strong interest in health and wellness. Students focus on the various facets of a healthy rural community. Going beyond the basics of health care, they explore different aspects of wellness within a community and develop tools to attain community wellness goals. Students blend and apply both contemporary and traditional health and wellness tools. Graduates may find employment with tribal governments, health consortia, clinics and schools. The human and social development concentration is for students interested in social services, social justice, community wellness, and cultural development. Graduates may find employment with tribal governments, health consortia, clinics, and schools.
- The community research and indigenous knowledge concentration is for students with interests in applied research involving Alaska Native communities, cultures, languages, ceremonial performances and histories. Students learn principles of ethical research, explore issues of intellectual and cultural property rights, and acquire skills to do ethnographies, oral histories, community surveys and needs assessments, and archival research. Graduates may find employment with museums, ANCSA corporations, tribal governments, and state and federal agencies.
- The concentration in indigenous organization management is designed for students interested in development and operations of indigenous organizations in rural Alaska. The tribal and municipal governance concentration is for students interested in tribal governance and rural municipal & borough government (Home Rule). Students develop an understanding of the history of and constitutional basis for tribal governance, various home rule governance structures, basics of federal Indian law, principles and practices of self-determination, and the mandates of the Alaska Native Claims Settlement Act. They develop skills in planning, budgeting and human resources management. Students can pursue a special interest, such as management of health programs, tribal governance programs or Alaska Native corporations, and tailor the concentration to these specifications through choice of related courses and electives. Graduates may find employment with tribal and municipal governments and organizations, ANCSA corporations, and state and federal agencies.
- The natural resource development concentration is designed for students with an interest in land and resources development, co-management and conservation. The integrated resource management concentration is designed for students interested in land use, subsistence, cultural resources, and co-management. Students learn about traditional ecological knowledge, principles of natural resources management and policy, adaptive management, conservation and ecotourism, and skills for effective public/private/tribal collaboration in resource management. Management strategies for addressing climate change are explored. Graduates may find employment with ANCSA corporations, regional and tribal entities, or state and federal agencies.
- The concentration in rural community business and economic development planning The entrepreneurship and economic development concentration is for students interested in creating sustainable economies in rural and indigenous communities, with a focus on small business development. Students learn to develop business and marketing plans, economic development planning, and basic principles of financial and human resources management for rural enterprises. Graduates find employment in ANCSA corporations, regional development organizations, economic development agencies and as local entrepreneurs.
- The multidisciplinary concentration is intended for students who wish to combine two or more Rural Development concentrations or combine a Rural Development concentration with another discipline.

Students will work closely with their advisor to select the appropriate courses for the concentration.

TM F171 Introduction to the Indian Reservation Roads Program 1 credit

Entrepreneurship and Economic Development Complete the following:

<u>RD 430 Indigenous Economic Development & Entrepreneurship --3 credits</u> <u>RD 470 ANCSA: Pre-1971 to Present--3 credits</u> <u>RD 471 Corporate Social Responsibility & Accountability in Rural & Indigenous Contexts --3 credits</u> <u>Complete an additional 6 credits from: Alaska Native Studies; Applied Business; Business Administration;</u> <u>Construction Trades Technology; Economics; Tribal Management. \*\*\*</u>

# Multidisciplinary

<u>Complete 15 credits from two or more existing concentrations. Courses must include at least 9 credits from the required course lists of the existing concentrations.</u>

Minimum credits required--120 credits

\* Students must earn a C- grade or better in each course.

\*\* Concentration area and elective credits may also fulfill the humanities, social science or mathematics general requirements for the B.A. degree. Prerequisites are required for many of these courses; however, prerequisites do not apply to the credit requirement.

\*\*\* Recommended courses programs. Course substitutions relevant to the concentration area may be made with approval of the Rural Development faculty advisor.

### Minor

Complete the following: Any three-credit RD course at the 300 level or above--3 credits RD electives at the F200 level or above--12 credits Minimum credits required--15 credits

# D. ESTIMATED IMPACT

WHAT IMPACT, IF ANY, WILL THIS HAVE ON BUDGET, FACILITIES/SPACE, FACULTY, ETC.

This should have no impact on budget or facilities/space. We have the faculty to support these changes.

# E. IMPACTS ON PROGRAMS/DEPTS:

What programs/departments will be affected by this proposed action? Include information on the Programs/Departments contacted (e.g., email, memo)

Programs with courses currently listed in the concentration areas may be affected since students can no longer take 21 relatively unrestricted credits. The reduction in concentration credits from 21 to 15 is due, in part to the need for students to have a minor, a requirement that had not been followed due to the program being originally approved without a minor requirement (the concentrations were intended to meet the spirit of the minor requirement). The department was unable to continue without the minor so the concentrations have been tightened in terms of required classes and reduced in credits. Programs that commonly contribute to RD BA student concentrations that do not already have a minor available have been encouraged to develop one. Tribal Management and Ethnobotany have submitted proposals for minors.

# F. IF MAJOR CHANGE - ASSESSMENT OF THE PROGRAM:

Description of the student learning outcomes assessment process.)

These program changes were prompted, in part, by our most recent SLOA reports and our new communications plan. Here is a potential draft for new SLOA after the changes have been implemented.

# UNIVERSITY OF ALASKA FAIRBANKS Student Learning Outcomes Assessment Plan Rural Development BA 2017-2018 Draft College of Rural and Community Development

Expanded Statement of	Intended Objectives/Outcomes	Assessment Criteria and	Implementation
Institutional Purpose		Procedures	(what, when, who)
MISSION STATEMENT:	Students will understand the tenets and practices of rural development as an academic and	Impressionistic history. Papers/Projects from RD	Faculty teaching RD core courses will fill out impressionistic history for
Our mission is to increase cultural awareness and strengthen leadership capacity for rural and Indigenous communities in Alaska and the Circumpolar North through degree programs that promote academic excellence, personal development, professional skills, global awareness and respect for	relate to rural Alaska and Alaska Native community development.	<ul> <li>475 Senior Projects from KD</li> <li>475 Senior Project will be evaluated annually by a committee of no less than three ANS faculty using prepared rubric.</li> <li>70% of students will meet or exceed expectations.</li> </ul>	each RD major within one month of completion of class. audiences.	using the same rubric.	presentations.
		Data from the rubrics will be
		aggregated and compared
		by the department chair
		over time. A potential issue
		with this measurement is
		that students go through
		the program at significantly
		varying speeds. However,
		over time the information
		should show trends that will
		be helpful.

# JUSTIFICATION FOR ACTION REQUESTED

The purpose of the department and campus-wide curriculum committees is to scrutinize program/degree change applications to make sure that the quality of UAF education is not lowered as a result of the proposed change. Please address this in your response. This section needs to be self-explanatory. If you drop a course, is it because the material is covered elsewhere? Use as much space as needed to fully justify the proposed change and explain what has been done to ensure that the quality of the program is not compromised as a result.

Description: the description has been modified to emphasize the interdisciplinary nature of rural development and update admissions information.

Concentration areas: the concentration areas have been revised to better reflect the content area.

- The community health and wellness concentration has been updated to "human and social development."
- The community research and indigenous knowledge concentration was eliminated as the topics are better covered and placed within the Alaska Native Studies program.
- The indigenous organization management concentration has been updated to "tribal and municipal governance."
- The natural resource development concentration has been updated to "integrated resource management."
- The rural community business and economic development planning concentration has been updated to "entrepreneurship and economic development."
- One concentration, Multidisciplinary, was added to allow students to combine areas of interest and to also continue to support students who come to the program with a large number of previously earned credits. By having a defined multidisciplinary concentration we hope to support these students while providing more focus for their concentration courses.

Rural Development core: the core has increased from 24 credits to 27 credits. The core is intended to focus on building students' skillsets in various areas of rural development practice. We have added three new core courses:

- RD 225 Communicating for Rural Development is the foundation course for the new RD communications plan and will introduce students to the various oral and written communication styles utilized in rural development.
- RD 340 Community Research Toolbox provides students with hands on practice in research methods.
- RD 474 Applied Community Research is a research/project design and planning course to support more community based research and projects in students' RD 475 Rural Development Senior Project capstone course. RD 340 and RD 474 split and expand upon the elements currently taught in RD 350, which has been eliminated from the core.

Two courses were removed from the core:

- RD 350 Community-based Research in Indigenous Contexts has been split into two courses (above).
- RD 300 Rural Development Internship has also been eliminated because most students do not need internship experience and are petitioning out of the course. The course is still available for those who do, but is no longer part of the core.

Two courses have been revised to better reflect the content of the courses:

- RD 325 Community Development Strategies has been renamed "Rural Development Principles and Practices" and the description has been updated.
- RD 351 Strategic Planning for Rural Communities has been renamed "Strategic Planning and Decision Making" and the description has been updated.

**Concentration:** 

- Credit requirement for concentrations has been reduced from 21 credits to 15 credits. Three of those credits were added to the core. The other three have become electives. Since the concentration areas are now more focused another elective option will help students who come to the program with large numbers of previously earned credits.
- The reduction in concentration credits from 21 to 15 is due, in part to the need for students to have a minor, a requirement that had not been followed due to the program being originally approved without a minor requirement (the concentrations were intended to meet the spirit of the minor requirement). The department was unable to continue without the minor so the concentrations have been tightened in terms of required classes and reduced in credits.
- Each concentration area now has 3 required courses (9 credits). Having required concentration courses will focus students and ensure that they graduate with the necessary knowledge and skills in that concentration area. Students have been able to select from such a wide variety of courses that it is possible to graduate with a concentration area without taking any classes that directly address the topic.
- The remaining 6 credits are to come from program areas instead of specific courses. Eliminating the concentration course lists simplifies the program and should reduce the number of petitions necessary. Providing a list of approved programs still provides guidance to students, but allows more freedom in selecting classes.
