

**FISH F340 Seafood Business
FALL 2014**

Instructor

Dr. Quentin S.W. Fong, Associate Professor
Kodiak Seafood and Marine Science Center
118 Trident Way
Kodiak AK 99615
Tel: 907-486-1516
Cell: 907-942-5776
E-mail: qsfong@alaska.edu

Office Hours:

Monday to Friday: 11:00 a.m. to 12:00 p.m.; or by appointment

Meeting Times

9:30 – 11:00 a.m., Tuesdays and Thursdays, Room 225 Kodiak Seafood and Marine Science Center and by video conference

Course Description and Goals

This course presents the development and management of a successful seafood business from inception to operation. Practical application of business planning, obtaining financing, accounting, permitting, feasibility analysis, marketing, human resource management, and operational aspects of seafood harvesting and processing using case studies and guest lecturers from seafood industry will be introduced.

This course will be primarily delivered by lectures, supported by case studies to illustrate concepts presented.

At the end of this course, the student will understand the appropriate managerial and decision-making tools that are needed to start and run a seafood business, focusing on the harvesting and processing sectors. In addition to learning basic managerial skills, students will also understand and apply the tools that measure management performance and the profitability of the seafood business. At the end of the semester, the student will:

- Learn and know how to write a seafood business plan.
- Learn and know how to determine which type of business structure, such as private business, partnerships, and corporation would be best suited for his/her business.
- Learn and know how to conduct break-even analysis for planning purposes, and understand the uses of statement of cash-flow, income statement, and the balance sheet to maximize the profitability of a seafood business.
- Understand the permitting and regulatory process to start a seafood business. For example, if a student plans to start a seafood processing facility, he/she would know who to contact in the state of Alaska (e.g. Department of Environmental Regulation), what type of paperwork he/she needs, (e.g. HACCP - Hazardous Critical Control Point plan), and how to obtain the knowledge to comply with regulation (e.g. take a 3 day HACCP course with the Alaska Sea Grant Marine Advisory Program).

- Learn and know how to conduct seafood market research, put together and execute a marketing management plan that will optimally place a seafood product with highest return, and identify resources that can help a seafood business market their products (e.g. Alaska Seafood Marketing Institute).

The students of this class will have the opportunity to listen and ask questions with practitioners in the seafood industry such as seafood trader/brokers, commercial fishermen, seafood processing plant owner/operators, and/or seafood restaurant operators.

As part of the requirement of this course, the students will also have the opportunity to practice putting together a seafood business plan of their interest.

Prerequisites: FISH F261 or approval by Instructor.

Credits: 3 + 0

Special Needs

Please contact me as soon as possible if you need accommodations and course adjustments due to a disability so that I will make the necessary arrangements with the Office of Disabilities Services.

Reading Assignments

Currently, there are no specific text books devoted to the topic of Seafood Business. Thus the reading materials for the course will be obtained from various sources. However, there are two text books that the instructor will draw heavily upon to illustrate concepts on cost and profitability analysis, and market research, implementation, and measurement. Students are not required to purchase the text books. Selected readings from the books will be provided electronically through UAF Blackboard:

- Kay, R., W. Edwards, & P. Duffy. 2013. *Farm Management*. McGraw-Hill (7th Edition). 480 pp. ISBN: 978-0073545875
- Kotler, P. & G. Armstrong. 2013. *Principles of Marketing*. Prentice Hall (15th Edition). 720 pp. ISBN: 978-0133084047
- Readings will be provided on UAF Blackboard (<http://classes.uaf.edu>)

Grading

Grades will be assigned using a plus-minus system based on the following scale:

A > 93
A- 90-93
B+ 87-89
B 84-86
B- 80-83
C+ 77-79
C 70-76
C- 65-69

Point and percentage values for each evaluation are as follows:

<u>Component</u>	<u>Points</u>	<u>Percent Total</u>
Homework	250	25%
Mid-Term Exam	250	25%
Final Exam	250	25%
Term Project/Presentation	250	25%
Total	1000	100%

Homework Assignment

There will be 5 homework assignments. Each assignment is worth 50 points. All homework assignments are due by e-mail to me no later than 5PM one week after it is assigned. For example, if the homework set is assigned Tuesday, Oct 7, it is due no later than 5PM Oct 14 to my e-mail account. Late assignments will not be accepted and your missed work will be assigned a zero score. It is your responsibility to contact me at least three days before the assignment due date if you cannot turn it in due to a legitimate reason.

The homework assignments will not only assist you in understanding how to operate a seafood business but also assist you in developing critical thinking to identify opportunities and/or to solve potential problems. For example, a set of financial data of a seafood operation may be presented to ask you to determine the viability of the operation. Another assignment may ask you how you would handle a customer complaint of the seafood you sold them did not conform to specifications.

Exams

There will be two exams, one mid-term and one final. The final exam will be accumulative. Unless there is an emergency, request for making up an exam will only be honored if a legitimate reason is provided to me at least one week prior. Both the mid-term and the final worth 250 points and 25% of the grade each.

Term Project/Presentation

The term project/presentation will require you to write a business plan of a seafood operation of your choice. Depending on the size of the class, this will be a group effort. You will learn the mechanics of putting together a business plan during the first 4 weeks of the semester and you will have 9 more weeks to put together and refine the business plan. I will work with each group outside of class to guide you through the process. The business plan is due no later than 5 pm Dec 04 to me by e-mail. I will then distribute each of the business plans to the rest of the class to evaluate. Each group will have 10 minutes to present the business plan and 10 minutes for question and answer by the rest of the class. More specific guidance and information will be given over the course.

Honor System

Unless you are specifically instructed, all assignments submitted are expected to be your own work. The faculty, staff, and students of University of Alaska Fairbanks do not

tolerate any academic dishonesty. Any cheating, plagiarism, and other violations will be reported. Moreover, you will automatically fail this course.

Course Outline

<u>Topic</u>	<u>Date</u>	<u>Readings</u>
INTRODUCTION		
The Concept of Profit and the Profit Triangle	Sep 04	Readings
Alaska Seafood in the Global Market Place	Sep 09	Kotler, Ch 19; Readings
