PROGRAM IDENTIFICATION:

DEGREE Geography PROGRAM		
Degree Level: (i.e., M.S., Ph.D.)	Certificate, A.A., A.A.S., B.A., B.S., M.A.,	BA & BS

A. CHANGE IN DEGREE REQUIREMENTS: (Brief statement of program/degree changes and objectives)

The changes to the Geography BA and BS programs mostly involve additions and removals of restricted electives. There are also some minor editorial changes to clarify the description of the program and to correct some errors.

These changes serve multiple purposes:

- 1. To update the selection of restricted electives based on the availability of new courses, and the deletion of some courses.
- 2. To update the BS concentrations to reflect changes in course availability, as well as changes in the job market and workplace requirements in environmental-related fields.
- 3. To more closely coordinate the Geography degrees with the NRM BS degree, and to make adjustments based on the pending revisions to the NRM BS degree.

B. CURRENT REQUIREMENTS AS IT APPEARS IN THE CATALOG:

Geography

School of Natural Resources and Agricultural Sciences UA Geography Program 907-474-7188 www.uagp.uaf.edu

BA, BS DEGREES; MINOR

Minimum Requirements for Degrees: 120 credits

Geography is a broad holistic study of the interactions among various natural/environmental, political, cultural and economic systems, and how those interactions create the world we see today at both local and global scales. Geography takes a synthesizing and inherently interdisciplinary approach to develop an integrated understanding of climate change, resource development, energy use and conservation, geopolitics, sustainable development, assessment of natural and human-caused environmental hazards, land-use change, regional conflicts, and economic and political developments all over the world. Geography also provides the framework for the integration of emerging technologies such as GIS, remote sensing and geo-visualization into a broad range of academic and professional fields.

The geography BA and BS degrees are built upon a group of required courses that provide students with a firm grounding in the fundamental components of the discipline, including global geographic perspectives, geography of the earth's natural systems, geography of human systems, geospatial sciences (GIS, remote sensing, geo-visualization), and the synthesis of these core perspectives through an integrating capstone experience.

The geography BA degree provides broad cultural training and background in the liberal arts with an emphasis on the circumpolar North and Pacific Rim. The BA prepares students for careers in management, policy, teaching, field-based research, regional planning, and private sector careers. The BA also provides an excellent foundation for advanced studies in a wide range of academic disciplines.

BA students are encouraged to coordinate minors, electives, and internships to develop further expertise within a chosen region or topic (see #4, below), to take advantage of the considerable topical and regional expertise found throughout the UAF community, and also to underscore the important role other disciplines play within the field of geography.

Three specialized concentrations are available to students pursuing the BS degree; environmental studies; landscape analysis and climate change studies; and geospatial sciences.

The environmental studies concentration provides the foundation necessary for understanding interactions between natural and human systems, analysis of environmental issues from an interdisciplinary geographic perspective, a diverse technical and scientific approach to environmental issues, and the ability to design balanced solutions to environmental problems.

The landscape analysis and climate change studies concentration integrates and synthesizes courses in geography, climate, geologic and biological sciences, as well as geospatial sciences and technology. Students will gain a sound and interdisciplinary understanding of how environmental change influences landscape patterns and human activity and welfare, on both spatial (e.g. latitude, altitude)and temporal (e.g. past, future) scales. Senior practicum courses serve as integrating capstone experiences, enabling students to apply what they have learned in real-world settings.

The geospatial sciences concentration emphasizes skills and practices in geographic information systems, remote sensing, geo-visualization and analysis of spatial patterns. Courses in GIS, remote sensing, GPS, map design, spatial statistics and computer programming are integrated with the geography foundation curriculum and courses in natural sciences.

Major -- BA Degree

- 1. Complete the general university requirements.
- 2. Complete the BA degree requirements.
- 3. Complete the following:*

GEOG F101--Expedition Earth: Introduction to Geography--3 credits
 GEOG F101--Expedition Earth: Introduction to Geography--3 credits
 GEOG F312--People, Places, and Environment: Principles of Human Geography--3 credits
 GEOG F338--Introduction to Geographic Information Systems (3)
 or GEOG F435--GIS Analysis (4)--3 - 4 credits
 GEOG F490W,O--Geography Seminar--3 credits

- 4. Complete the following program (major) requirements. Students will tailor their program through course selection from the categories below in consultation with their advisor to focus on a subspecialty in the circumpolar North and/or the Pacific Rim.
 - a. Regional geography: Complete two of the following: GEOG F302--Geography of Alaska--3 credits GEOG F303--Geography of United States and Canada--3 credits GEOG F305W--Geography of Europe--3 credits GEOG F306--Geography of Russia--3 credits GEOG F311W--Geography of Asia--3 credits GEOG F410--Geography of the Pacific Rim--3 credits GEOG F427--Polar Geography--3 credits
 - b. Physical geography: Complete one of the following:

GEOG F307--Weather and Climate--3 credits GEOG F339--Maps and Landscape Analysis--3 credits GEOG F412--Geography of Climate and Environmental Change--3 credits GEOG F418--Biogeography--3 credits

- c. Human geography: Complete one of the following: GEOG F203--World Economic Geography--3 credits GEOG F402--Resources and Environment--3 credits GEOG F404--Urban Geography--3 credits GEOG F405--Political Geography--3 credits
- Techniques: Complete one of the following: GEOG F301--Geographic Field Studies--3 credits GEOG F309--Digital Cartography and Geo-Visualization--4 credits GEOS F458--Geoscience Applications of GPS and GIS--3 credits
- e. Electives: Complete two courses (six credits) from any of the above categories, or other courses appropriate to the student's chosen program of study. Both courses must be at F300-level or higher and approved by the student's advisor.

5. Complete approved electives open

6. Minimum credits required--120 credits

Note: Geography majors are encouraged to reinforce their program focus with a minor in one of the following areas: Alaska Native Studies, Anthropology, Asian Studies, Economics, Environmental Politics, Foreign Languages, Geology, Geophysics, Global Studies, History, Journalism, Natural Resource Management, Northern Studies, Political Science, Rural Development, Russian Studies.

Note: Students and faculty advisors should carefully review prerequisites for courses outlined in each required and/or optional area. In some instances courses, either in geography or other fields, require successful completion of 1 - 3 prerequisite courses. Therefore, students and faculty should note minimum degree credit hours are 120, but the actual number of required course credits may exceed that number.

Major -- BS Degree

- 1. Complete the general university requirements.
- Complete the BS degree requirements. See individual BS concentrations for specific course requirements.

3. Complete the following:*

- GEOG F101--Expedition Earth: Introduction to Geography--3 credits GEOG F111X--Earth and Environment: Elements of Physical Geography--4 credits GEOG F338--Introduction to Geographic Information Systems (3) or GEOG F435--GIS Analysis (4)--3 - 4 credits
- 4. Complete one of the following concentrations:*

Environmental Studies

a. Complete the following:

GEOG F207--Research Methods and Statistics in Geography--3 credits GEOG F307--Weather and Climate--3 credits GEOG F312--People, Places, and Environment: Principles of Human Geography--3 credits GEOG F339--Maps and Landscape Analysis--3 credits GEOG F402--Resources and Environment--3 credits GEOG F490W,O--Geography Seminar--3 credits

b. Complete two courses from the following environmental studies electives:

	GEOG F463Wilderness Concepts3 credits NRM F303XEnvironmental Ethics and Actions**3 credits NRM F407Environmental Law3 credits	
C.	Complete three courses from the following environmental system electives: ANTH F428Ecological Anthropology and Regional Sustainability3 credits BIOL F371Principles of Ecology4 credits BIOL/NRM F277Introduction to Conservation Biology3 credits GEOS F304Geomorphology3 credits NRM F375Forest Ecology3 credits NRM F380WSoils and the Environment3 credits	
d.	Complete one of the following environmental management electives: FISH F487W,OFisheries Management3 credits NRM F365Principles of Outdoor Recreation Management3 credits NRM F430Resource Management Planning3 credits NRM F450Forest Management3 credits NRM F480Soil Management for Quality and Conservation3 credits	
e.	Complete one of the following techniques electives: GEOG F301Geographic Field Studies3 credits GEOG F309Digital Cartography and Geo-Visualization4 credits GEOG F435GIS Analysis (can fulfill techniques requirement ONLY if not used in section #3 above)4 credits GEOS F458Geoscience Applications of GPS and GIS3 credits	
	Landscape Analysis and Climate Change Studies	
a.	As part of the baccalaureate core requirements, complete CHEM F105X and STAT F200X.	
b.	As part of the BS degree requirements, complete BIOL F115X and BIOL F116X.	
C.	Complete the following: GEOG F312People, Places, and Environment: Principles of Human Geography3 credits GEOG F490W,OGeography Seminar3 credits	
d.	Complete one of the following processes requirements (geomorphology, climate, ecology, systems): GEOG F307Weather and Climate3 credits GEOG F412Geography of Climate and Environmental Change3 credits GEOG F418Biogeography3 credits BIOL F371Principles of Ecology4 credits GEOS F304Geomorphology3 credits	
e.	Complete one of the following processes electives: NRM F370Watershed Management3 credits NRM F380WSoils and the Environment3 credits or a processes-oriented content course approved by a geography faculty advisor.	
f.	Complete the following patterns requirements (field methods, GIS/remote sensing tools): GEOG F222 Fundamentals of Geospatial Sciences3 credits GEOG F309Digital Cartography and Geo-Visualization4 credits GEOG F339Maps and Landscape Analysis3 credits GEOG F435GIS Analysis (4) (can fulfill patterns requirement only if NOT used in section #3 above) or GEOS F458Geoscience Application GPS and GIS (3)3 - 4 credits	
g.	Complete at least one of the following patterns electives:	

GE F471Remote Sensing for Engineering3 credits GEOS F422Geoscience Applications of Remote Sensing3 credits NRM F641Remote Sensing Applications in Natural Resources4 credits
 Complete the following senior practicum requirements (program synthesis): GEOG F488Geographic Assessment and Prediction of Natural Hazards3 credits GEOG F489WSenior Practicum: Research Design and Presentation Methods4 credits
Geospatial Sciences
 Complete the following: GEOG F312People, Places, and the Environment: Principles of Human Geography3 credits GEOG F490W,OGeography Seminar3 credits
 b. Complete the following: CS F103Introduction to Computer Programming3 credits GEOG F222Fundamentals of Geospatial Sciences3 credits GEOG F300Internship in Natural Resources Management and Geography3 credits GEOG F338Introduction to Geographic Information Systems3 credits GEOG F339Maps and Landscape Analysis3 - 4 credits GEOG F435GIS Analysis4 credits STAT F200XElementary Probability and Statistics3 credits
 Complete at least two remote sensing electives: GE F471Remote Sensing for Engineering3 credits GEOS F422Geoscience Applications of Remote Sensing3 credits NRM F641Remote Sensing Applications in Natural Resources4 credits
 Complete at least two GIS electives: GE F376GIS in Geological and Environmental Engineering3 credits GEOG F309Digital Cartography and Geo-Visualization4 credits GEOS F458Geoscience Applications of GPS and GIS3 credits NRM F638GIS Programming***3 credits
 Complete at least two landscape electives: BIOL F4690Landscape Ecology and Wildlife Habitat3 credits GEOS F304Geomorphology3 credits GEOS F408Photogeology2 credits GEOS F430Statistics and Data Analysis in Geology3 credits
5. Minimum credits required120 credits
* Students must earn a C grade or better in each course.
** If used to fulfill core requirements, NRM F303X may not also count towards geography major.
*** Graduate level credit used to complete this undergraduate degree program may NOT be applied towards future graduate degree programs.
Note: Students and faculty advisors should carefully review prerequisites for courses outlined in each required and/or optional area. In some instances, courses, either in geography or other fields, require successful completion of from 1 - 3 prerequisite courses. Therefore, students and faculty should note minimum degree credit hours are 120, but the actual number of required course credits may exceed that number.
Minor
Geography
 Complete the following: GEOG F101Expedition Earth: Introduction to Geography3 credits

GEOG F111XEarth and Environment: Elements of Physical Geography4 credits GEOG electives8 - 9 credits
2. Minimum credits required15 - 16 credits * Students must earn a C grade or better in each course.
Geographic Information Systems
 Complete the following:* GEOG F111XEarth and Environment: Introduction to Physical Geography4 credits GEOG/GEOS F222Fundamentals of Geospatial Sciences3 credits GEOG F309Digital Cartography and Geo-visualization4 credits GEOG F338Introduction to Geographic Information Systems3 credits
 Complete one of the following:* GEOG F300Internship in Geography - in GIS (3) or any GIS-related course approved by geography department chair3 credits GEOG F435GIS Analysis4 credits GEOG F430Google Earth and Neogeography3 credits NRM F369GIS and Remote Sensing for Natural Resources3 credits
3. Minimum credits required17 credits * Students must earn a C grade or better in each course.

BA, BS DEGREES; MINOR

Minimum Requirements for Degrees: 120 credits

Geography is a broad holistic study of the interactions among various natural/environmental, political, cultural and economic systems, and how those interactions create the world we see today at both local and global scales. Geography takes a synthesizing and inherently interdisciplinary approach to develop an integrated understanding of climate change, resource development, energy use and conservation, geopolitics, sustainable development, assessment of natural and human-caused environmental hazards, land-use change, regional conflicts, and economic and political developments all over the world. Geography also provides the framework for the integration of <u>existing and emerging technologies such as GIS</u>, remote sensing, and geo-visualization into a broad range of academic and professional fields.

The geography BA and BS degrees are built upon a group of required courses that <u>gives</u> students a firm grounding in the fundamental components of the discipline, including global geographic perspectives, geography of the earth's natural systems, geography of human systems, geospatial sciences (GIS, remote sensing, geo-visualization), and the synthesis of these core perspectives through an integrating capstone experience.

Our students find work in such fields as mapping technology (GIS/Cartography), regional planning, international relations, state and federal resource management, transportation planning, environmental impact assessment, tourism, and teaching. Many of our students go on to graduate study in geography, natural resources, environmental science, or planning.

The geography BA degree gives students a broad understanding of the interactions among the physical environments, economics, political events, and cultures of various regions of the world, and equips students with the ability to interpret contemporary geopolitical and environmental

2. Minimum credits required--15 - 16 credits * Students must earn a C grade or better in each course.

Geographic Information Systems

Complete the following:*
 GEOG F111X--Earth and Environment: Introduction to Physical Geography--4 credits
 GEOG/GEOS F222--Fundamentals of Geospatial Sciences--3 credits
 GEOG F309--Digital Cartography and Geo-visualization--4 credits
 GEOG F338--Introduction to Geographic Information Systems--3 credits

2. Complete one of the following:*

GEOG F300--Internship in Geography - in GIS (3) or any GIS-related course approved by geography department chair--3 credits GEOG F435--GIS Analysis--4 credits GEOG F430--Google Earth and Neogeography--3 credits NRM F369--GIS and Remote Sensing for Natural Resources--3 credits

3. Minimum credits required--17 credits * Students must earn a C grade or better in each course.

D. ESTIMATED IMPACT

WHAT IMPACT, IF ANY, WILL THIS HAVE ON BUDGET, FACILITIES/SPACE, FACULTY, ETC.

No significant impact. Will use existing faculty, space, and curriculum resources

E. IMPACTS ON PROGRAMS/DEPTS:

What programs/departments will be affected by this proposed action? Include information on the Programs/Departments contacted (e.g., email, memo)

These changes may impact enrollments in some courses in the NRM department, and incorporate some new courses being proposed in the NRM program. The Geography and NRM Departments have been closely collaborating on all these changes, and so are in agreement about them.

Most of the other curriculum changes involve GEOS courses that many geography students already take, so there should be no significant impact on the GEOS enrollments.

F. IF MAJOR CHANGE - ASSESSMENT OF THE PROGRAM:

Description of the student learning outcomes assessment process.)

Geography SLOA consists of assembling a concise portfolio of student work and evaluations of that work. Written work and records of oral presentations are systematically collected from specific required courses as each geography major progresses through his/her program. Each student's early work from introductory courses is compared to work produced in senior capstone courses, and a faculty committee produces an evaluation of improvement in writing, presentation, and critical thinking skills for each student. These evaluations are then compiled in aggregate form to give a general representation of measurable improvement in these skills for a given cohort of graduating students. These aggregate measures will be compared from year to year to assess whether the entire degree program is producing an increase, decrease, or steady state in student learning over time.

JUSTIFICATION FOR ACTION REQUESTED

The purpose of the department and campus-wide curriculum committees is to scrutinize program/degree change applications to make sure that the quality of UAF education is not lowered as a result of the proposed change. Please address this in your response. This section needs to be self-explanatory. If you drop a course, is it because the material is covered elsewhere? Use as much space as needed to fully justify the proposed change and explain what has been done to ensure that the quality of the program is not compromised as a result.

The major changes proposed here are to the selection of restricted electives in several sections of both the Geography BA and BS. Electives have been removed because they either are no longer offered consistently	Formatted: Font: Trebuchet MS	
enough to practically use them as requirements, or because the job market and workplace requirements in environmental-related fields have changed enough to warrant an adjustment to the set of skills we offer our students.	Not Bold, Font color: Auto	
Electives have been added to increase the flexibility in the degrees, to take advantage of new relevant courses that have appeared at UAF, and again, to give students (especially in the BS concentrations) better preparation for the changing requirements of the job market.		
Several changes that might appear to be removed requirements are actually just editorial rearrangements to make the degrees easier to understand. For instance, GEOG F312People, Places, and Environment, and GEOG F490W,OGeography Seminar, have been listed separately under each BS concentration. We have moved them to the general Geography BS requirements to avoid the repetition.		
The number and title of GEOG 489W—Senior Practicum, has been changed to GEOG F483W Research Design, Writing, and Presentation Methods, to accommodate cross-listing with NRM. The intent and structure of that course for Geography majors has not changed.		
GEOG F488Geographic Assessment and Prediction of Natural Hazards has been removed from the "senior practicum requirements" in the Landscape Analysis and Climate Change concentration because those students already take GEOG 489W (Now GEOG 483W) and GEOG 490W,O as "capstone" courses, and we've found that requiring GEOG 488 is capstone overload for the students.		
We have added NRM F366—Survey Research in Natural Resource Management, and GEOG F483W Research Design, Writing, and Presentation Methods, as "Techniques" electives under the BA and the Environmental Studies concentration in the BS to broaden students' ability to develop social science research skills as well as technical skills,	Formatted: Font: 8 pt, Not Bold	
We have required NRM 303x Environmental Ethics and Actions, as part of the baccalaureate core in the BA and BS because this is a course that is very relevant to geography majors, and allowing them to take it as part of the core keeps the burden of degree requirements down.	Font color: Auto	
We have required BIOL 115x and 116x as part of the BS requirements in the BS Environmental Studies concentration because these courses are prerequisites for several of the restricted electives in this concentration, and allowing them to take it as part of their BS requirements keeps the burden of degree requirements down.
