I. PROGRAM PRODUCTIVITY AND EFFICIENCY

1) Discuss or provide context for the following components of the PAIR data, and provide an explanation of any numbers that may seem out of place given the size and capacity of your program:
   a. Total SCH
   b. Number of majors
   c. Number of degrees
   d. Time to degree
   e. Department budget
   f. FTEs
   If the data do not accurately reflect the program, explain why not. Also, discuss trends, e.g., is enrollment growing or decreasing? Why?

2) Describe the way this program fits into the department as a whole.
   What other programs are offered in the department and how are they connected with this program?
   What percentage of faculty and staff time is devoted to this program as opposed to others offered?
   What are the budgetary needs associated with this program in particular, e.g., how many faculty teach exclusively or predominantly the courses required for this program?
   Do those courses meet requirements for other programs?
   Are there any special equipment, space, commodity or other needs associated with the program that are not covered by student fees?

4) Describe the demand for the program by students and the prospective job market for program graduates. (For assessing the job market, you may find the following publication useful (http://labor.alaska.gov/trends/), particularly their annual employment forecast. The national Bureau of Labor Statistics also has potentially applicable information (http://www.bls.gov/ooh/).
If your program tracks actual job placement of its graduates, please provide that information. However, it's recognized that not all degrees qualify recipients for specific occupations, so in some cases, you may need to address this question in broader terms, e.g., what skill set does the degree represent? What kinds of jobs are graduates obtaining?
