

Research Program Review Committee
Sept. 2014 Committee Report
Submitted by: Richard Machida

The final report being presented to the Chancellor by the Office of the VCR has been completed by the working group. The working group met on Wednesday, September 16, 2014, to finalize some open issues for upcoming reviews. We were told that the existing group will be participating in the second review possibly with the addition of several more reviewers to lessen the workload. Two subcommittees were formed to identify what additional data would have been useful and revising the instructions to the units.

The second review will start mid January to be completed early February.
